Part I Geological and Paleoecological Events of the Late Pleistocene and Holocene in Northern Eurasia

1 Geological and Paleoecological Events of the Late Pleistocene along Eurasian Coastal Areas of the Arctic Ocean	3
General Upper Pleistocene Stratigraphic Scheme for Northern Eurasia ...	3
Duration of the Mikulino Interglaciation	5
Correlation of the Natural Events Correlative with MIS 5d–5a in Northern West Europe and Northwestern Russia.....	6
2 Late Pleistocene Geologic-Paleoecological Events in the North of European Russia	11
Relationship between Land and Sea Areas during the Mikulino Interglacial in Northern Eurasia.....	11
Genetic Types of Continental Sediments	14
Marine Sediments of the Boreal Transgression in the North of European Russia	15
3 Main Geologic-Paleoecological Events of the Late Pleistocene in the North of Western Siberia	31
4 Geologic-Paleoecological Events of the Late Pleistocene in the Northern-Siberian Lowland and Taimyr Peninsula	37
5 The Late Glacial Time and Holocene of Northern Eurasia	43
6 Outlines of the Late Pleistocene and Holocene History of the East Arctic Seas	47
7 The Deglaciation Time and Holocene of Northern Eurasia	57

Part II Marine Sedimentation in the Arctic Ocean and Subarctic Seas

8 The Seas of West Subarctic Region	61
Geologic and Oceanographic Setting	61
History of Sedimentation	68
History of Sedimentation Rates	68
History of Sedimentation on the Vøring Plateau During the Last 25 ka	88
History of Sedimentation at the Continental Margin of Eastern and South-Eastern Greenland During the Last 130 ka	107
9 The Arctic Ocean	113
Recent Environment	113
Morphostructure, Oceanographic and Sea-Ice Setting, Recent Sediments and Their Mineral Composition	113
Facies Variations of Holocene Sediments on the Yermak Plateau (According to Study Data of >63 mkm Fraction)	124
History of Sedimentation	136
History of Sedimentation Rates During the Last 130 ka	136
History of Sedimentation on the Yermak Plateau During the Last 190 ka	148
Organic-Geochemical Sediment Studies of the Eastern Part of the Central Arctic	173
10 The Western Arctic Seas	177
Recent Sedimentation Environment	177
The Barents Sea	177
The Kara Sea	178
Surface Sediments of the Pechora Sea	179
Surface Sediments of St. Anna Trough	186
Facies Zonality of Surface Sediments in the Eastern Kara Sea	194
History of Sedimentation	210
Late- and Post-Glacial History of Sedimentation in the Eastern Part of the Barents Sea	210
Holocene Sedimentation History in the Southern Novaya Zemlya Trough	224
History of Sedimentation in the Pechora Sea During the Late Pleistocene and Holocene	241
Light Fraction Mineralogy of the Upper Quaternary Sediments from the Saint Anna Trough and Its Paleooceanographic Interpretation	247
Holocene History of Yenisei River Discharge	256
Holocene History of Ob River Discharge	272

11 Eastern Arctic Seas	289
Recent Sedimentation Environment	289
The Laptev Sea	289
The East Siberian Sea	290
The Chukchi Sea	291
History of Sedimentation	291
History of Sedimentation in the Laptev Sea During the Late Weichselian to Holocene by Geophysical and Geochemical Data	292
Holocene History of the Lena and Other Rivers Discharge in the Laptev Sea	295
Organic Geochemical Data About Sedimentation History Along the Continental Slope of the East Siberian Sea During the Last Climatic Cycle	297
Preliminary Data About Accumulation of Diatom-Bearing Clayey Silts at the Chukchi Sea Shelf	298
12 Seas of the Eastern Subarctic	301
Recent Sedimentation Environment	301
History of Sedimentation	307
History of Sedimentation in the Deep-Water Part of the Shirshov Ridge (Bering Sea) During the Last Three Marine-Isotope Stages	307
History of Sedimentation in the Northern Sea of Okhotsk During the Last 1.1 Ma	310
 Part III The Late Pleistocene Paleogeographic Events of Northern Eurasia and History of Sedimentation in the Subarctic Seas and the Arctic Ocean in Relation to the Northern Hemisphere Glaciation during the Last Climatic Cycle	
13 Characteristic Features of the Mikulino Landscapes	333
14 Results of Paleoclimate Studies	337
15 Particularities of Sedimentation Processes Within the Continental Blocks and Marine Basins	345
Deglaciation Peculiarities	345
Facies Variability during Glaciations, Deglaciations, Interglacials	349
Geological History of the Arctic Ocean Sea Ice during the Last 60 ka	350
Intercoupling of Atmo-, Hydro-, Cryo-, Bio-, and Lithospheres	353
