1 A Paediatric Overview of Children Seen in the ENT Outpatient Department	<i>Helen Bantock</i>	1
Introduction: Paediatric Consultation		1
<i>Development in the First Five Years of Life</i>		2
Children with Special Needs		2
Speech and Language Delay or Disorder		2
Autistic Spectrum		2
Global Delay		3
Specific Learning Difficulties		3
Syndromes		3
Down Syndrome		3
Behaviour Difficulties		3
Attention Deficit Hyperactivity Disorder		3
Social Difficulties		3
Types of Abuse		3
Child Abuse in the Context of an ENT Clinic		4
Alerting Signs of Non-Accidental Injury and Abuse in a Clinic Setting		4
What to do if Abuse is Suspected		4
Links with Local Services		4
Primary Care Team		4
The Child Development Team		4
The Education Service		4
Child and Adolescent Mental Health Services		5
Social Services		5
Non-Statutory Organisations		5
2 Nursing Aspects of Paediatric ENT	<i>Rosalind Wilson and Judith Barton</i>	7
Introduction		7
Communication		7
Consent for Surgery		8
Staffing		8
The Physical Environment		8
Tracheostomy		8
Parents		9
Day Surgery		9
Pain Control		10
3 Anaesthesia for Paediatric ENT Surgery	<i>Ian Barker</i>	11
Introduction		11
<i>General Considerations</i>		12
Anaesthesia for Children		12
Anaesthesia for the Newborn		12
<i>Hypoxia</i>		12
<i>Hypothermia</i>		12
<i>Hypoglycaemia</i>		12
Intravenous Fluid Therapy for Children		12
<i>Specific Conditions</i>		13
Post-Tonsillectomy Bleeding		13
<i>Assessment</i>		13
<i>Resuscitation</i>		13
<i>Anaesthesia</i>		13
Airway Endoscopy		13
<i>Indications</i>		13
<i>Induction</i>		14
<i>Maintenance</i>		14
Laser Surgery		14
Obstructive Sleep Apnoea		15
Anaesthetic Equipment		15
Endotracheal Tubes		15
Laryngeal Mask Airway		16
Pulse Oximeter		16
<i>Limitations</i>		16
Carbon Dioxide Monitor		16
4 The Evolution of Speech and Language	<i>John F. Stein</i>	19
Introduction		19
Is Language Innate or Learnt?		20
Human Evolution		20
Left-Sided Specialisation		20
Emotional Vocalisations		21
Mirror Neurones		21
Bipedalism and the Aquatic Ape Hypothesis		22
Larynx Descent		22

Brain Enlargement	23	7	Genetics of Non-Syndromic Deafness	47
Right-Handedness	23		<i>Maria Bitner-Glindzicz</i>	
Selective Advantages of Speech	23		Introduction	47
Gesture and Speech	24		Investigation of the Aetiology	
Writing	24		of Hearing Loss	48
Conclusion	24		Reasons	48
5 Evidence-Based Management			Protocol	48
of Speech and Language Delays	27		History	48
<i>Amy McConkey Robbins</i>			Examination	48
Introduction	27		Investigation	48
Milestones for Communication			Genetic Hearing Loss	49
Development	28		Recessive Genes: Common/	
Normal Variation in Language			Recognizable Types of	
Learning	28		Non-Syndromic Genetic Hearing Loss	50
Normal Variation versus			<i>GJB2 (Connexin26)</i>	50
Communication Delay	28		<i>SLC26A4 (Pendred and Non-</i>	
Communication Milestones			<i>Syndromic Enlarged Vestibular</i>	
in the First Year of Life	29		<i>Aqueduct)</i>	52
Clinical Use of Table 5.1 by Physicians	31		<i>OTOF (Auditory Neuropathy)</i>	53
Speech and Language Intervention			Dominant Genes: Common/	
is Correlated with Young Age			Recognizable Types of Non-	
at Identification	32		Syndromic Genetic Hearing Loss	53
Hearing Loss can be Identified			<i>WFS1 (Dominant Low-Frequency</i>	
and Treated as Early as the Newborn			<i>Sensorineural Hearing Loss)</i>	53
Period	32		<i>COCH (Menière-Like Symptoms)</i> ...	54
Differential Diagnosis of Several				
Communication Disorders	33			
Association Between Some Speech/		8 ENT-Related Syndromes	57	
Language Characteristics and Reading				
Disability	34	<i>David Albert and Fiona Connell</i>		
Evidence-Based Approach				
to the Management of Children's Speech		Definition	58	
and Language Development	34	Introduction	58	
		Resources	59	
6 Paediatric Voice	37	Syndromes of Particular Relevance		
<i>Mark E. Boseley</i>		to the ENT Clinician	59	
<i>and Christopher J. Hartnick</i>		Down Syndrome	59	
Introduction	37	<i>Genetics</i>	59	
Anatomy	38	<i>ENT Features</i>	59	
Gross	38	<i>General Features</i>	59	
Histology	38	Pierre Robin Sequence	59	
Diagnostic Techniques	39	<i>Genetics</i>	59	
Physical Examination	39	<i>ENT Features</i>	60	
Voice Outcome Surveys	39	Treacher Collins Syndrome	60	
Common Voice Pathologies	39	<i>Genetics</i>	60	
Vocal Fold Nodules	39	<i>ENT Features</i>	60	
Voice Results Following		<i>General Features</i>	60	
Laryngotracheal Reconstruction	42	Goldenhar Syndrome	60	
Recurrent Respiratory Papillomatosis	43	CHARGE Syndrome	60	
Vocal Fold Paralysis	43	<i>Genetics</i>	60	
		<i>ENT Features</i>	60	
		<i>General Features</i>	61	
		<i>Genetics</i>	61	
		<i>ENT Features</i>	61	
		<i>General Features</i>	61	

Branchio-oto-renal Syndrome	62	ENT Features	68
<i>Genetics</i>	62	<i>General Features</i>	68
<i>ENT Features</i>	62	Waardenburg Syndrome	68
<i>General Features</i>	62	<i>Genetics</i>	68
22q11.2 Deletion Syndrome	62	<i>ENT Features</i>	68
<i>Genetics</i>	62	<i>General Features</i>	68
<i>ENT Features</i>	62	Jervell and Lange-Nielsen Syndrome ..	68
<i>General Features</i>	62	<i>Genetics</i>	68
Craniosynostosis Syndromes	63	<i>ENT Features</i>	69
<i>Genetics</i>	63	<i>General Features</i>	69
<i>ENT Features</i>	63	Gorlin Syndrome	69
<i>General Features</i>	63	<i>Genetics</i>	69
Alport Syndrome	63	<i>ENT Features</i>	69
<i>Genetics</i>	63	<i>General Features</i>	69
<i>ENT Features</i>	63	Holoprosencephaly	69
<i>General Features</i>	63	<i>Genetics</i>	69
Pendred Syndrome	63	<i>ENT Features</i>	69
Usher Syndrome	63	<i>General Features</i>	69
<i>Genetics</i>	63	Mucopolysaccharidoses	69
Alstrom Syndrome	65	<i>Genetics</i>	69
<i>Genetics</i>	65	<i>ENT Features</i>	69
<i>ENT Features</i>	65	<i>General Features</i>	69
<i>General Features</i>	65	Foetal Alcohol Syndrome	70
Syndromes Less Commonly Seen		<i>Genetics</i>	70
by ENT Surgeons	65	<i>ENT Features</i>	70
Achondroplasia	65	<i>General Features</i>	70
<i>Genetics</i>	65	Foetal Cytomegalovirus Syndrome ..	70
<i>ENT Features</i>	65	<i>Features</i>	70
<i>General Features</i>	65	Congenital rubella syndrome	70
Beckwith-Wiedemann Syndrome	65	<i>Features</i>	70
<i>Genetics</i>	65	Acknowledgements	70
