

Table of Contents

Contributed Papers

Dynamical Systems of Simplices in Dimension Two or Three	1
<i>Gérald Bourgeois and Sébastien Orange</i>	
On the Design and Implementation of a Geometric Knowledge Base	22
<i>Xiaoyu Chen, Ying Huang, and Dongming Wang</i>	
Proof Certificates for Algebra and Their Application to Automatic Geometry Theorem Proving	42
<i>Benjamin Grégoire, Loïc Pottier, and Laurent Théry</i>	
Multivariate Resultants in Bernstein Basis	60
<i>Deepak Kapur and Manfred Minimair</i>	
Unique Factorization Domains in the Java Computer Algebra System . . .	86
<i>Heinz Kredel</i>	
Automatic Verification of the Adequacy of Models for Families of Geometric Objects	116
<i>Aless Lasaruk and Thomas Sturm</i>	
Formalizing Projective Plane Geometry in Coq	141
<i>Nicolas Magaud, Julien Narboux, and Pascal Schreck</i>	
Linear Programming for Bernstein Based Solvers	163
<i>Dominique Michelucci and Christoph Fünfzig</i>	
Offsetting Revolution Surfaces	179
<i>Fernando San Segundo and J. Rafael Sendra</i>	
An Introduction to Java Geometry Expert (Extended Abstract)	189
<i>Zheng Ye, Shang-Ching Chou, and Xiao-Shan Gao</i>	
On the Heilbronn Optimal Configuration of Seven Points in the Square	196
<i>Zhenbing Zeng and Liangyu Chen</i>	
Author Index	225
