

TABLE OF CONTENTS

	<u>Page</u>
<u>CHAPTER I.</u> Introduction	
1. The first eigen value problem	1
2. The second eigen value problem	10
•	
<u>CHAPTER II.</u> Hilbert Space Background-Small Eigen Values	
1. A perturbation problem	16
2. The resolvent equation	20
3. Spectral resolutions	24
4. Convergence in dimension	28
<u>CHAPTER III.</u> The Fourier Transform Theorem	
1. Spaces and operators	31
2. The application of the perturbation theory	39
3. Convergence of $\underline{S}^{\wedge}(t)^{\frac{1}{2}}$ to $(\underline{S}^{\wedge})^{\frac{1}{2}}$	44
4. Convergence of $\underline{F}^{\wedge}(t)$ to $\underline{F}^{\wedge}$	49
5. Convergence of $\underline{S}^{\wedge}(t)^{\frac{1}{2}}\underline{F}^{\wedge}(t)$ to $(\underline{S}^{\wedge})^{\frac{1}{2}}$ on $\underline{M}^{\wedge}$, Part I	54
6. Convergence of $\underline{S}^{\wedge}(t)^{\frac{1}{2}}\underline{F}^{\wedge}(t)$ to $(\underline{S}^{\wedge})^{\frac{1}{2}}$ on $\underline{M}^{\wedge}$, Part II	57
7. The asymptotic formula, I	65
8. The asymptotic formula, II	70
<u>CHAPTER IV.</u> The Fourier Series Theorem	
1. Spaces and operators	74
2. Application of the perturbation theory	78
3. Convergence of $\underline{S}^{\wedge}(t)^{\frac{1}{2}}$ to $(\underline{S}^{\wedge})^{\frac{1}{2}}$	83
4. Convergence of $\underline{F}^{\wedge}(t)$ to $\underline{F}^{\wedge}$	83
5. Convergence of $\underline{S}^{\wedge}(t)^{\frac{1}{2}}\underline{F}^{\wedge}(t)$ to $(\underline{S}^{\wedge})^{\frac{1}{2}}\underline{F}^{\wedge}$, Part I	92
6. Convergence of $\underline{S}^{\wedge}(t)^{\frac{1}{2}}\underline{F}^{\wedge}(t)$ to $(\underline{S}^{\wedge})^{\frac{1}{2}}$ on $\underline{M}^{\wedge}$, Part II	93
7. The asymptotic formula, I	93
8. The asymptotic formula, II	96

CHAPTER V. Hilbert Space Theory - Large Eigen Values	
1. A perturbation theorem	97
2. Convergence in dimension	102
CHAPTER VI. The Fourier Series and Fourier Transform Theorems	
1. Spaces and operators	105
2. Further operators	110
3. $\hat{F}(t)$ and $\hat{F}(t)^*$	113
4. $\hat{U}(t)\hat{F}(t)$ and $\hat{U}\hat{F}$, $\hat{V}(t)\hat{F}(t)$ and $\hat{V}\hat{F}$	118
5. $\hat{U}(t)$ and $\hat{U}$, $\hat{V}(t)$ and $\hat{V}$	121
6. $\hat{N}(t)$	122
7. The asymptotic formula	125
8. The Fourier transform	134
9. Asymptotic formulas for the large eigen value problem continued	137
