

P. Biane R. Durrett

# Lectures on Probability Theory

Ecole d'Eté de Probabilités  
de Saint-Flour XXIII – 1993

Editor: P. Bernard

Springer

## TABLE OF CONTENTS

|                                                                 |           |
|-----------------------------------------------------------------|-----------|
| <b>Philippe BIANE : "CALCUL STOCHASTIQUE NON-COMMUTATIF"</b>    | <b>1</b>  |
| Introduction                                                    | 4         |
| 1. Espaces de probabilité non-commutatifs finis                 | 11        |
| 2. Théorie spectrale                                            | 22        |
| 3. Variables de Gauss et de Poisson et relations de commutation | 28        |
| 4. Espaces de Fock                                              | 41        |
| 5. Intégration stochastique non-commutative                     | 52        |
| 6. Applications du calcul stochastique non-commutatif           | 72        |
| Commentaires et bibliographie                                   | 89        |
| Références                                                      | 93        |
| <br>                                                            |           |
| <b>Rick DURRETT : "TEN LECTURES ON PARTICLE SYSTEMS"</b>        | <b>97</b> |
| Preface                                                         | 98        |
| 1. Overview (two lectures)                                      | 100       |
| 2. Construction, Basic Properties                               | 119       |
| 3. Percolation Substructures, Duality                           | 126       |
| 4. A Comparison Theorem                                         | 138       |
| 5. Threshold Models                                             | 147       |
| 6. Cyclic Models                                                | 156       |
| 7. Long Range Limits                                            | 164       |
| 8. Rapid Stirring Limits                                        | 171       |
| 9. Predator Prey Systems                                        | 180       |
| Appendix. Proofs of the Comparison Results                      | 191       |
| References                                                      | 198       |
