

CONTENTS

Preface	v
Contributors	xi

Supersonic Combustion Status and Issues

<i>H. Lee Beach, Jr.</i>	1
--------------------------------	---

Discussion on Supersonic Combustion

Reporters: <i>A. Kumar and M. Y. Hussaini</i>	16
---	----

FLAME STRUCTURE

Numerical Modeling of Two-Dimensional Axisymmetric Laminar Diffusion Flames

<i>M. D. Smooke</i>	23
---------------------------	----

Relevance of Nonpremixed Laminar Flames to Turbulent Combustion

<i>Sanjay M. Correa</i>	45
-------------------------------	----

Laminar-Flame Structure

<i>B. Rogg</i>	70
----------------------	----

Discussion on Flame Structure

Reporters: <i>A. Kapila and M. Matalon</i>	98
--	----

FLAME STABILITY

Flame Stability

<i>J. Buckmaster</i>	103
----------------------------	-----

Stability of Laminar Diffusion Flames in Compressible Mixing Layers

<i>T. L. Jackson</i>	131
----------------------------	-----

Role of Acoustics in Combustion Instability

A. K. Kapila 162

Hydrodynamic Instabilities in Flames

Moshe Matalon 179

Discussion on Flame Stability

Reporters: *A. Kapila and M. Matalon* 197

FLAME HOLDING/EXTINCTION**Mechanisms of Flame Stabilization in Subsonic and Supersonic Flows**

C. K. Law 201

Fuel Injection and Flameholding in High Speed Combustion Systems

Ann R. Karagozian 237

Flame Holding in Unconfined Turbulent Premixed Flames

I. G. Shepherd, J. R. Hertzberg, and L. Talbot 253

Discussion on Flame Holding/Extinction

Reporter: *D. Keyes* 271

CHEMICAL KINETICS**Position Paper on Chemical Kinetics of Combustion Processes**

Raymond W. Walker 277

Pressure Effects on the Kinetics of High Speed Chemically Reacting Flows

Richard A. Yetter, Frederick L. Dryer, and David M. Golden ... 309

Chemical Kinetic Research Related to Combustion in High-Speed Flows

Casimir J. Jachimowski 339

TURBULENCE/KINETIC INTERACTION

The Interaction of Turbulence and Chemical Kinetics

W. Kollman and J.-Y Chen 359

Turbulence-Kinetics Interaction in Recirculatory Flows

D. R. Ballal 403

Comments on the Interaction of Turbulence and Chemical Kinetics

Paul A. Libby 423

TRANSITION TO DETONATION

On the Transition from Deflagration to Detonation

Joseph E. Shepherd and John H. S. Lee 439

Discussion on the Transition from Deflagration to Detonation (DDT)

Reporters: *D. J. Singh and A. Kumar* 488

Transition to Detonation – Role of Explosion within an Explosion

Martin Sichel 491

Discussion on Transition to Detonation

Reporters: *D. J. Singh and A. Kumar* 525

REACTING FREE SHEAR LAYERS

Mixing Power Concepts in Scramjet Combustor Design

J. Swithenbank, B. C. R. Ewan, S. B. Chin, L. Shao, and Y. Wu 531

Discussion on Mixing Power Concepts in Scramjet Combustor Design

Reporter: *J. P. Drummond* 585

Some Current Issues in the Analysis of Reacting Shear Layers: Computational Challenges	
<i>Peyman Givi and James J. Riley</i>	588
Discussion on Reacting Shear Layers	
Reporter: <i>J. P. Drummond</i>	648
