The Production of Strange Nuclear Systems

<i>Ed V. Hungerford</i>	1
1 A Perspective	1
2 Formulation of the Hyperon Potentials	4
2.1 The Elementary Baryon-Baryon Potential	4
2.2 The Effective Λ -Nucleus Potential	5
2.3 An Example - the s-shell Hypernuclei	6
3 Production Mechanisms	7
3.1 The Distorted Wave Impulse Approximation	7
3.2 Kinematics	8
3.3 Production into the Continuum	9
3.4 Summary of the General Features of Production Mechanisms ..	11
4 Beams and Detectors	12
4.1 Beams	12
4.2 Detectors	14
4.3 The (γ, K^+) Reaction	19
5 The Production of $S = -2$ Nuclear Systems	22
5.1 Background	22
5.2 The Double Λ Systems Formed in (K^-, K^+) Reaction	23
5.3 Nuclear Systems Containing a Ξ^-	25
6 Systems with Multiple Strangeness	25
7 Concluding Remarks	26
References	27

Hypernuclear Gamma-Ray Spectroscopy and the Structure of p-shell Nuclei and Hypernuclei

<i>D. J. Millener</i>	31
1 Introduction	31
2 The ΛN (YN) Effective Interaction	32
3 The s-shell Λ Hypernuclei	37
4 The ${}^7_{\Lambda}\text{Li}$ Hypernucleus	39

5	The p-shell Nuclei	43
5.1	The Central Interaction	46
5.2	Structure of ${}^6\text{Li}$, ${}^7\text{Li}$, and ${}^8\text{Be}$	47
5.3	Structure of ${}^9\text{Be}$ and ${}^{11}\text{C}$	50
5.4	Structure of ${}^{10}\text{B}$ and ${}^{10}\text{Be}$	54
5.5	Structure of ${}^{12}\text{C}$, ${}^{13}\text{C}$, and ${}^{14}\text{N}$	55
6	The p-shell Hypernuclei	57
6.1	The Shell-Model Calculations	57
6.2	The ${}^9_\Lambda\text{Be}$ Hypernucleus	58
6.3	The ${}^{16}_\Lambda\text{O}$ Hypernucleus	60
6.4	The ${}^{15}_\Lambda\text{N}$ Hypernucleus	62
6.5	M1 transitions in ${}^{14}\text{N}$ and ${}^{15}_\Lambda\text{N}$	65
6.6	The ${}^{10}_\Lambda\text{B}$, ${}^{12}_\Lambda\text{C}$, and ${}^{13}_\Lambda\text{C}$ Hypernuclei	67
6.7	The ${}^{11}_\Lambda\text{B}$ Hypernucleus	71
7	Summary and Outlook	73
A	Basics of Racah Algebra for $\text{SU}(2)$	76
B	Two-body Matrix Elements of the ΛN Interaction	77
	References	78

Spectroscopy of Hypernuclei with Meson Beams

	<i>Tomofumi Nagae</i>	81
1	Introduction	81
2	Experimental Methods for Hypernuclear Spectroscopy	81
2.1	Mass Measurement	81
2.2	Spin Assignment	85
2.3	Angular Distribution	87
2.4	Hypernuclear γ -ray Spectroscopy	88
2.5	Meson Beams	89
3	Brief History of Hypernuclear Spectroscopy	91
4	$(\pi^\pm, \text{K}^+)$ Spectroscopy	92
5	Examples of Hypernuclear Spectroscopy	97
5.1	Hypernuclear γ -ray Spectroscopy	97
6	New Hypernuclear Spectroscopy at J-PARC	100
6.1	E05: Spectroscopic Study of Ξ Hypernuclei	101
6.2	E13: Gamma-ray Spectroscopy of Light Hypernuclei	106
6.3	E15: A Search for Deeply-Bound Kaonic Nuclear States	108
7	Summary	109
