

Table of contents for volume 2

Foreword — VII

Foreword to the English edition — IX

Acknowledgment — XI

5 Dyes for writing, painting, and drawing — 499

- 5.1 Types of bonds in the dye-substrate system — **501**
- 5.2 Paper as a dye carrier — **503**
- 5.2.1 Paper as ink carrier — **503**
- 5.2.2 Paper dyeing — **504**
- 5.2.3 Modification to paper compatible dyes — **506**
- 5.3 Reactive dyes — **510**
- 5.4 Direct or substantive dyes — **513**
- 5.5 Mordant dyes (metal complex dyes) — **518**
- 5.6 Cationic dyes — **522**
- 5.7 Anionic or acid dyes — **524**

6 Structure of paint systems — 529

- 6.1 Binders — **530**
- 6.1.1 History — **530**
- 6.1.2 Binder analytics — **534**
- 6.1.3 Drying of binders — **536**
- 6.1.4 Bonding types in the world of colorants — **538**
- 6.2 Solvents — **541**
- 6.3 Wetting agents and dispersants, grinding paints — **542**
- 6.3.1 Wetting agents — **543**
- 6.3.2 Dispersants — **550**
- 6.3.3 Stabilization of dispersions, dispersants — **552**
- 6.4 Thickener, rheology modifier — **556**
- 6.5 Film-forming aids (coalescing agents) — **565**
- 6.6 Other excipients — **566**
- 6.7 Paper — **567**
- 6.7.1 Structure and composition of raw materials — **567**
- 6.7.2 Pulp from wood — **576**
- 6.7.3 Composition and manufacture of paper — **589**
- 6.7.4 Sizing and coating — **605**
- 6.7.5 Calendering (satinage) — **613**
- 6.7.6 Paper grades, general and industrial — **614**
- 6.7.7 Special case artists' paper — **616**

- 6.7.8 Paper decay — **622**
- 6.7.9 Aging-resistant paper — **624**
- 6.7.10 Yellowing — **624**

7 Paint systems in art — 627

- 7.1 Ceramics and their painting — **627**
- 7.1.1 Classical ceramic painting — **627**
- 7.1.2 Pigments of the cold-painting technique — **630**
- 7.1.3 Ceramic enamel and glaze colors — **630**
- 7.2 Stained glass — **640**
- 7.2.1 Reverse glass painting — **642**
- 7.2.2 Stained glass windows — **644**
- 7.2.3 Stained glass — **646**
- 7.3 Fresco (mural painting) — **649**
- 7.3.1 Fresco-buono technique — **650**
- 7.3.2 Lime-painting technique — **651**
- 7.3.3 Fresco-secco technique — **651**
- 7.3.4 Mixed techniques — **652**
- 7.3.5 Pigment degradations — **652**
- 7.4 Oil paint — **655**
- 7.4.1 Basic composition of oil paints — **655**
- 7.4.2 Types of oils — **656**
- 7.4.3 Drying of oils, film formation — **660**
- 7.4.4 Stand oils — **672**
- 7.4.5 Effect of heavy metals, siccatives — **675**
- 7.4.6 Linseed oil varnish — **676**
- 7.4.7 Technical improvement of colorants and painting agents in the nineteenth century, paint tubes — **676**
- 7.4.8 Resins, resin balsam, turpentine oil — **679**
- 7.4.9 Other solvents: benzines, turpentine substitutes — **687**
- 7.4.10 Varnish materials — **689**
- 7.4.11 Pigment degradations — **691**
- 7.5 Protein systems (poster paint, gouache paint, glue paint, size paint, distemper paint) — **703**
- 7.5.1 Albumin as binder (whole egg, egg white) — **706**
- 7.5.2 Collagen as a binder (poster, gouache, glue, size, distemper paint) — **709**
- 7.5.3 Casein as binder — **713**
- 7.6 Tempera — **717**
- 7.6.1 Egg yolk tempera, pure egg tempera — **718**
- 7.6.2 Egg tempera — **720**
- 7.6.3 Fatty egg tempera, egg-oil emulsions — **720**
- 7.7 Watercolors — **721**

7.7.1	Basic composition of watercolors —	721
7.7.2	Gum Arabic —	723
7.7.3	Gum tragacanth —	725
7.7.4	Ox gall —	726
7.7.5	Paper —	726
7.8	Alkyd colors —	727
7.9	Acrylic paints —	731
7.9.1	Basic composition —	732
7.9.2	Irreversible film formation —	734
7.9.3	Retarders —	738
7.9.4	Media, thickeners, gels, acrylic butter —	738
7.9.5	Wetting agents and dispersants —	739
7.9.6	Film formation aids —	740
7.9.7	Other additives —	741
7.10	Lithographic printing, lithography —	741
7.10.1	Lithographic crayons and inks —	744
7.10.2	Reprint and materials for reprint —	744
7.10.3	Printing inks for lithography —	745
7.11	Silicate paint —	745
7.12	Low binder systems: chalks and pencils —	746
7.12.1	Blackboard chalk —	746
7.12.2	Pastel crayons —	747
7.12.3	Pencils —	747
7.12.4	Colored pencils —	750
7.12.5	Paper —	750
7.13	Fingerpaint —	750
7.14	Intarsia art —	751
8	Inks —	753
8.1	Carbon inks —	755
8.1.1	Inks in antiquity —	756
8.1.2	Modern carbon inks —	760
8.1.3	Chemistry of carbonization, combustion, and sooting —	761
8.2	Chemistry of phenolic ink constituents —	775
8.2.1	Oxidation and polyphenols —	776
8.2.2	Hydrolyzable tannins —	779
8.2.3	Condensed or nonhydrolyzable tannins, proanthocyanidins —	781
8.2.4	Tannin-like tanning agents —	783
8.3	Inks based on natural materials, book illumination —	787
8.3.1	Colored natural inks, book illumination —	787
8.3.2	Brown inks —	792
8.4	Durable writing inks (iron gall inks) —	793

8.4.1	Chemistry of iron gall inks —	796
8.4.2	Color of iron gall inks —	797
8.4.3	Brown iron inks —	798
8.4.4	Excursion: the iron-phenol reaction —	800
8.5	Dye inks (fountain pen, felt-tip pen, ballpoint pen, inkjet printing) —	801
8.5.1	Function of components —	806
8.5.2	Colorants for fountain pen ink —	815
8.5.3	Colorants for felt-tip, fiber-tip, ballpoint pens —	818
8.5.4	Colorants for inkjet inks —	818
8.5.5	Paper, inkjet support materials —	826
8.5.6	Colorants for stamp pads —	832
8.6	Laser or copier toner —	832
8.7	Printing inks —	836
8.7.1	Inks —	841
8.7.2	Pigments —	843
8.7.3	Binders —	846
8.7.4	Rosin derivatives as binders —	849
8.7.5	Solvents —	852
8.7.6	Auxiliaries —	854
8.7.7	Paper —	855
8.8	Tusche —	855
8.8.1	Sepia, Natural Brown 9 —	857
8.8.2	Shellac —	858

Bibliography — 861

Index — 903
