

Table of Contents

Rüdiger Hoffmann, <i>"Nothing but a Lung, a Glottis, and a Mouth" – The Long Way of Speech Synthesis</i>	9
Peter Donhauser, <i>From speech- and sound research to applications and products</i>	29
Christian Huber, Benjamin Fischer and Bernhard Graf, <i>Corpus of Austrian Dialect Recordings from the 20th Century – A Cooperation Project</i>	31
Christoph Draxler and Jürgen Trouvain, <i>On Principles of Phonetic Data Archiving: From Paelo-Phonetics to Modern Speech Data Management</i>	41
Carina Lozo, Jan Luttenberger and Michael Pucher, <i>The thought collective behind thirty years of progress in speech synthesis</i>	49
Silke Berdux and Alexander Steinbeißer, <i>Speaking Apparatus Now Speaking: A Project at the Deutsches Museum in Munich</i>	59
Fabian Brackhane, <i>A Polyglottal Speech Synthesis – Modifications for a Replica of Kempelen's Speaking Machine</i>	69
Takayuki Arai, <i>Sound Sources used in Speech Production Research with Physical Models of the Human Vocal Tract</i>	79
Kathriki S. Nataraj, Hirak Dasgupta and Prem C. Pandey, <i>Early indirect techniques for estimating the vocal tract area function</i>	85
Quintino Lopes and Elisabete Pereira, <i>Armando de Lacerda and Experimental Phonetics in the Inter-war Period: Scientific Innovation and Circulation between Portugal, Germany and Harvard</i>	95
Rainer Jäckel, <i>Methodological aspects of early experimental phonetics</i>	105
Michael Ashby, <i>The acoustic analysis of early speech recordings</i>	113
Angelika Braun, <i>From Visible Speech to Voiceprints – The Missing Link</i>	123
