1	Global Environment: Climate and Microorganisms	1
1.1	Climate System	2
1.1.1	Components of the Climate System	2
1.1.2	Interactions Between the Components	7
1.1.3	Energy Balance of the Earth	7
1.1.4	Climate Change and Its Effects	9
1.1.5	Which Substances Have Which Effect on the Climate?	14
1.1.6	Projections	16
1.2	Global Cycles with Reservoirs and Material Flows	16
1.2.1	Global Carbon Cycle	17
1.2.2	Global Nitrogen Cycle	20
1.2.3	Global Sulfur Cycle	25
1.2.4	Global Phosphorus Cycle	28
1.2.5	Summary of Global Cycles	29
	References	30
