

Contents

Innovative and Smart Production

A Quantitative Method for the Investigation of Digitized Surfaces After Fine Milling Machining	3
Maik Mackiewicz and Jannik Backhaus	

Technologies for Circularity

Fatigue Life of Refurbished Fiber Reinforced Thermoplastics	19
Dennis Weintraut, Florian Kraft, Justus Freeden and Robert Meltke	
Manufacturing of Lightweight Parts by Sandwich Foam Injection Moulding using Recycled Thermoplastics	30
Annerose Hüttl, Mathias Kliem and Ralf Utescheny	

Functional Structures

Innovative Design Concept for the Safety of Battery Housing	47
Claudia Drebenstedt, Marcus Knobloch, David Löpitz, Elisa Ruth Bader and Patryk Nossol	
Thermocouple Fabrication by Cold Plasma Spray	59
N. Mainusch, D. Scholz, J. Linkmann, T. Abraham and W. Viöl	

Life Cycle Engineering

A Variability Model for Individual Life Cycle Paths in Life Cycle Engineering	73
Lukas Block, Maximilian Werner, Helge Spindler and Benjamin Schneider	
Increase the Ressource Efficiency by Evaluation of the Effects of Deep Rolling within the Design and Manufacturing Phase	86
Oliver Maiß, Karsten Röttger and Kolja Meyer	

Bio-based Material

Approaching a Smart, and Sustainable Interior for Future Mobility Solutions	99
Torben Seemann, Claudia Burgold, Sergey Stepanov, Marvin Christopher Vincenzo Omelan and Sebastian Stegmüller	
Fast Curing Biobased Epoxy Hardener for RTM Applications	112
Stefan Friebe, Ole Hansen and Jens Lüttke	
Investigation on the Bond Performance in Hybrid Wood-Plastic Components	127
Vicky Reichel, Werner Berlin, Tim Ossowski, Yvonne Phung and Klaus Dröder	

Generative Manufacturing

Atmospheric Pressure Plasma Sources for Additive Manufacturing	147
Thomas Neubert, Kristina Lachmann, Lara Schumann, Veysel Zeren, Tim Abraham and Michael Thomas	
Design Freedoms of Lattice Structures for Interlock Bonding	156
Raphael Freund, Fynn Matthias Sallach and Thomas Vietor	

Factories of the Future

Assisted Facility Layout Planning for Sustainable Automotive Assembly	173
Marian Süße, Antje Ahrens, Valentin Richter-Trummer and Steffen Ihlenfeldt	
Assembly and Through Life Services in the Context of Urban Cloud Manufacturing	189
Aydan Oguz, Pinar Bilge, Arne Glodde, Sina Rahlfs and Franz Dietrich	

Design and Simulation

AI-Based Performance Prediction and Its Application on the Design and Simulation of Cooling Plates for Battery Electric Vehicles	207
Niklas Klink, Stefan Buchkremer, Lutz-Eike Elend, Maksym Kalaidov and Thomas von Tschammer	
Innovative Module Design with Active and Passive Cooling of Traction Batteries	219
David Löffler, Rico Schmerler, Markus Grünert, Jan Clausen and Simon Schmidt	

Contribution to the Optimization of Metal-Composite Lightweight Structures in Context of Digital Linked Development Processes 228
Fabian Folprecht, Felix Bonn, Daniel Reinhold Haider, Sebastian Spitzer and Maik Gude

Reports from the Research Clusters

Cluster of Excellence Living, Adaptive and Energy-Autonomous Materials Systems (*livMatS*) 239
Thomas Speck, Monika E. Schulz, Anna Fischer and Jürgen Rühe

Potentials and Design of a Virtual Production System for Intelligent Battery Cell Manufacturing. 253
Kamal Hussein, Hans Thomas Augspurger Hernández, Dominik Mayer and Jürgen Fleischer

Author Index 265
