Preface xvii

About the Editors xix

1 Introduction to Glass Fiber-Based Composites and Structures 1

Jay Prakash Srivastava and Pankaj Kumar

- 1.1 Introduction 1
- 1.2 Applications 2
- 1.3 Classification of GFRC 5
 - 1.3.1 A-Type 5
 - 1.3.2 C-Type 6
 - 1.3.3 D-Type 6
 - 1.3.4 E-Type 7
 - 1.3.5 R-, S-, and T-Type 7
 - 1.3.6 S2-Type 7
 - 1.3.7 M-Type 7
 - 1.3.8 Z-Type 7
- 1.4 Classifications Based on Form 8
- 1.5 Structure 9
- 1.6 Mechanical Properties 10
- 1.7 Conclusion 13
- References 13

2 Synthesis of Cotton Fiber and Its Structure 17

Pankaj Kumar, Cherala Sai Ram, Jay P. Srivastava, Arun K. Behura, and Ashwini Kumar

- 2.1 Introduction 17
- 2.2 Cotton Fiber Classification 17
 - 2.2.1 Classification of the Cotton Fiber Based on the Strength 18
 - 2.2.2 Classification of the Cotton Fiber Based on Fiber Length Uniformity 18
 - 2.2.3 Classifications of the Cotton Based on Fiber Fineness 18
 - 2.2.4 Classifications of the Cotton Based on Fiber Color 18
 - 2.2.5 Classifications of the Cotton Based on Trash 18

2.2.6	Classifications of the Cotton Based on Leaf Grade	18
2.2.7	Classifications of the Cotton Based on Extraneous Materials	19
2.2.8	Classifications of the Cotton Based on Module Averaging	19
2.3	Surface Modification of Cotton Fibers	21
2.4	Solvents for Cotton	21
2.5	Chemical Treatment of Cotton Fiber	22
2.6	Chemical Composition	23
2.7	Structural Properties of Cotton	25
2.7.1	Constitution and Molecular Weight Distributions	25
2.7.2	Cotton Fiber Structure	25
2.7.3	Microscopic View of Cotton Fiber	26
2.7.4	Physical Properties of Cotton Fiber	26
2.8	Characterization Methods of Cotton Fiber	27
2.8.1	Measurement of Density	27
2.8.2	Measurement of Diameter	27
2.9	X-Ray Diffraction (XRD) Analysis	28
2.10	Fourier Transformation by Infrared Spectroscopy (FTIR) Analysis	29
2.11	Thermogravimetric Analysis (TGA)	29
2.12	Investigation of Scanning Electron Microscope	30
2.13	Investigation of Transmission Electron Microscope	31
2.14	Conclusions	32
	References	32

3 Fundamentals of Carbon-Fiber-Reinforced Composite and Structures 37

Rupita Ghosh, Subhadip Das, Sarada P. Mallick, and Rajan

3.1	Introduction	37
3.2	Classification of Carbon Fibers	38
3.3	Synthesis of Carbon Fiber	38
3.4	Surface Treatment of Carbon Fibers	40
3.5	Carbon-Fiber-Reinforced with Polymer Matrix Composites	41
3.5.1	Manufacturing of the Polymer Composites Reinforced with Carbon Fibers	42
3.5.1.1	Hand Lay-up and Spray-up Process	42
3.5.1.2	Molding	43
3.5.1.3	Filament Winding	43
3.5.1.4	Pultrusion	44
3.5.1.5	Injection Molding	44
3.5.2	Reinforcement of Carbon Fibers and Properties of CFRP Composites	44
3.6	Carbon-Fiber-Reinforced Ceramic Matrix Composites	46
3.6.1	Structure of Carbon-Fiber-Reinforced CMCs	47
3.6.2	Synthesis and Properties of Carbon-Fiber-Reinforced CMCs	48
3.6.2.1	Hot Pressing	48
3.6.2.2	Spark Plasma Sintering (SPS)	48
3.6.2.3	Infiltration Methods	49

3.6.2.4	Slurry Infiltration Process	50
3.6.2.5	Reactive Melt Infiltration	51
3.6.2.6	Polymer Infiltration and Pyrolysis	52
3.6.2.7	Sol–Gel Infiltration Process	52
3.7	Carbon-Fiber-Reinforced Carbon Matrix Composites	53
3.7.1	Structure of Carbon–Carbon Composites	53
3.7.2	Synthesis of Carbon–Carbon Composites	53
3.7.2.1	Thermosetting Resin-Based Carbon–Carbon Composite and Properties	54
3.7.2.2	Thermoplastic Pitch-Based Carbon–Carbon Composite and Properties	56
3.7.2.3	Chemical Vapor Deposition (CVD) and Properties	57
3.8	Conclusion	59
	References	59

4 Introduction to Semisynthetic and Synthetic Fiber Based Composites 67

Vishal N. Sulakhe

4.1	Introduction	67
4.2	Classifications	69
4.2.1	Semisynthetic Fibers	69
4.2.1.1	Rayon	69
4.2.1.2	Modal Fiber	69
4.2.1.3	Bamboo Rayon	70
4.2.1.4	Seacell Fiber	70
4.2.1.5	Acetate Fibers	70
4.2.2	Synthetic Fibers	71
4.2.2.1	Glass Fibers	71
4.2.2.2	Carbon Fiber	72
4.2.2.3	Graphene Fiber	73
4.2.2.4	Basalt Fiber	73
4.2.2.5	Kevlar	73
4.2.2.6	Nylon and Terylene	74
4.3	Challenges	74
4.4	Conclusions	75
	References	75

5 Tribological Properties of Natural Fiber-Reinforced Polymer Composites 81

A. Muthuraja and Dipen Kumar Rajak

5.1	Introduction	81
5.2	Chemical Treatment–Alkaline Treatment	83
5.2.1	Alkaline Treatment (Mercerization)	83
5.2.2	Silane Coupling Agents (Silanization)	83
5.2.3	Mechanical Properties of Synthetic and Natural Fibers	83

5.3	Tribological Behavior of Chemically Treated Composites	84
5.4	Tribological Behavior of Hybrid Composites	87
5.5	Conclusion	89
	References	89
6	Nonstructural Applications of Synthetic Fibers Composites	93
	<i>Ashish Gupta, Pankaj Kumar, Mandeep Singh, Hema Garg, Anisha Chaudhary, and Sanjay R. Dhakate</i>	
6.1	Introduction	93
6.2	Nonstructural Applications of SFRCs	94
6.2.1	Energy Sector	95
6.2.1.1	Batteries	95
6.2.1.2	Supercapacitors	96
6.2.1.3	Fuel Cells	97
6.2.1.4	Thermal Energy Storage (TES) Technology	99
6.2.1.5	Thermoelectric Energy Eeneration	99
6.2.2	Mechanical Industry	101
6.2.2.1	Tribological Applications	101
6.2.2.2	Civil Engineering	102
6.2.3	Electronic Sector	102
6.2.3.1	Light Emitting Diode (LED) Devices	103
6.2.3.2	Field-Effect Transistors (FET)	104
6.2.3.3	Sensors	104
6.2.3.4	EMI Shielding	106
6.2.4	Medical Sector	107
6.2.4.1	Drug Delivery	107
6.2.4.2	Protein/Gene Therapy	108
6.3	Conclusions and Future Challenges	108
	References	109
7	Structural Evolution, Mechanical Features, and Future Possibilities of Fiber, Textile, and Nano-cementitious Materials	117
	<i>Prashant Rawat, Sai Liu, and Deju Zhu</i>	
7.1	History of Fiber and Textile Reinforced Concrete	117
7.2	Components of Cementitious Materials	119
7.2.1	Matrix Materials	119
7.2.2	Reinforcements	121
7.2.3	Short Discontinuous Fibers	121
7.2.4	Textiles/Woven	123
7.2.5	Advanced Nanoparticles	126
7.3	Mechanical Performance of Reinforced Concrete	127

7.3.1	Mechanical Behavior of SF Reinforced Concrete	128
7.3.2	Mechanical Behavior of Textile Reinforced Concrete	128
7.3.3	Mechanical Behavior of Nanoparticles Reinforced Concrete	129
7.4	Outlook and Future of Reinforced Concrete	130
	References	131
8	Physical and Chemical Properties of Cotton Fiber-Based Composites	137
	<i>Pankaj Kumar, Cherala Sai Ram, Jay P. Srivastava, Ashwini Kumar, and Arun K. Behura</i>	
8.1	Fabrication Process for Cotton Fiber-Reinforced Composite	137
8.2	Mechanical Properties of Cotton Fiber-Reinforced Composites	138
8.2.1	Tensile Strength	138
8.2.2	Buckle Power	139
8.2.3	Compressive Strength	140
8.2.4	Impact Strength	141
8.2.5	Hardness	142
8.2.6	Thermogravimetric Analysis (TGA)	142
8.2.7	Water Absorption Test	143
8.2.8	Microscopic Morphology	144
8.2.9	Fourier Transformation by Infrared Spectroscopy (FTIR) Analysis	145
8.2.10	Investigation of Transmission Electron Microscope	146
8.3	Life Cycle and Environmental Assessment of Cotton Fibers Reinforced Composites	147
8.4	The Durability of Cotton Fiber-Reinforced Composites	148
8.5	Conclusions	148
	References	148
9	Properties of Carbon Nanotubes (CNT)	155
	<i>Vijay K. Singh, Puneet Kumar, Sunil K. Yadav, Chandrasekhar Saran, and Kaki V. Rao</i>	
9.1	Introduction	155
9.2	Carbon Nanotubes Family	156
9.2.1	Single-Walled Carbon Nanotube (SWCNT)	156
9.2.2	Multiwalled Carbon Nanotube (MWCNT)	157
9.3	Properties of CNTs	157
9.3.1	Mechanical Properties	157
9.3.2	Thermal Properties	157
9.3.3	Electrical Properties	158
9.3.4	Electronic Properties	159
9.3.5	Field-Emission Properties	159
9.4	Conclusion	160
	Acknowledgment	160
	References	161

10	Mechanical and Thermal Properties of Sisal Fiber-Based Composites	163
	<i>Vivek Mishra, Alok Agrawal, Saurabh Chandraker, and Abhishek Sharma</i>	
10.1	Introduction	163
10.2	Mechanical Properties of Sisal Fiber-Reinforced Composites	166
10.2.1	Tensile Properties	167
10.2.2	Flexural Properties	168
10.2.3	Impact Properties	171
10.2.4	Hardness	173
10.3	Thermal Behavior of Sisal Fiber-Reinforced Polymer Composites	175
10.3.1	Thermal Stability	175
10.3.2	Glass Transition Temperature	179
10.4	Conclusion	181
	References	182
 11	 Mechanical, Electrical, Magnetic, and Smart Properties of Synthetic Fiber Composites	 187
	<i>Hema Garg, Jayashree Mohanty, Abhishek K. Pathak, Ashish Gupta, Satish Teotia, and Bipin Kumar</i>	
11.1	Introduction	187
11.2	Mechanical Properties of FRP	188
11.2.1	Tensile Properties	189
11.2.2	Flexural Properties	190
11.2.3	Interlaminar Properties	191
11.2.3.1	ILSS and IFSS	192
11.2.3.2	Interlaminar Fracture Toughness	193
11.3	Influential Parameters on Mechanical Properties of FRP	194
11.3.1	Influence of Fiber Types	194
11.3.2	Influence of Matrix	195
11.3.3	Effect of Nanofillers	195
11.3.4	Electrical Properties	198
11.3.5	Magnetic and Electromagnetic Properties	200
11.3.6	Electromagnetic Properties: EMI Shielding	201
11.4	Smart Properties	201
11.4.1	Shape Memory Composites	202
11.4.2	Self-Healing Composites	203
	References	204
 12	 Thermal Properties of Natural Based Fibers Composites	 211
	<i>Ashwini Kumar, Arun K. Behura, Dipen K. Rajak, and Pankaj Kumar</i>	
12.1	Introduction	211
12.2	Natural Fibers	214
12.2.1	Natural Plant Fibers	215
12.2.2	Resins	217
12.2.3	Fillers	217

12.3	Thermo-gravimetric Investigation	218
12.3.1	Isothermic and Non-isothermic Thermo-gravimetric Investigation	219
12.3.2	Equation of Coats–Redfern	220
12.3.3	Equation of Horowitz–Metzger	220
12.4	Choice of Substance Based on TGI	220
12.5	Common Fibril-Strengthened Compounds	221
12.5.1	Thermosetting Compounds	221
12.5.2	Laminate Agrochemical Compounds	223
12.6	Common Fiber-Strengthened Bio Agrochemical Compounds	224
12.7	Blend of Nano Compounds	228
12.8	Conclusion and Summary	229
	References	230

14.2.2.2	Mohair	266
14.2.2.3	Cashmere	266
14.2.2.4	Alpaca Hair	266
14.2.2.5	Angora Hair	267
14.2.2.6	Silk Fiber	267
14.2.2.7	Avian Fiber	267
14.2.3	Mineral Fibers	267
14.3	Synthesis and Production of Natural Fibers	267
14.3.1	Extraction of Fibers	267
14.3.2	Extraction and Processing of Plant-Based Fiber	268
14.3.3	Extraction and Processing of Animal Fiber	268
14.3.3.1	Animal Wool and Hair Fiber Processing	269
14.3.3.2	Silk Fiber Processing	269
14.3.3.3	Feather and Avian Fiber	269
14.3.4	Extraction and Processing of Mineral Fiber	269
14.3.4.1	Asbestos	269
14.3.4.2	Ceramic Fiber	270
14.3.4.3	Metal Fiber	270
14.4	Treatment and Enhancement of Natural Fiber	270
14.4.1	Physical Treatment	271
14.4.1.1	Mechanical Treatment	271
14.4.1.2	Solvent Extraction	272
14.4.1.3	Electric Discharge	272
14.4.2	Chemical Treatment	273
14.4.2.1	Alkaline Treatment (Mercerization)	274
14.4.2.2	Acetone Treatment	274
14.4.2.3	Peroxide (Benzoylation) Treatment	275
14.4.2.4	Silane Coupling Agents (Silanization)	275
14.4.3	Biological Treatment	275
14.5	Fabrication of Techniques of NFRC	275
14.5.1	Hand Lay-up Technique	276
14.5.2	Vacuum Infusion Molding	276
14.5.3	Spray Lay-up Technique	276
14.5.4	Pultrusion	277
14.5.5	Resin Transfer Molding (RTM)	277
14.6	Mechanical Performance of Natural Fiber Reinforced Polymer Composites (NFRP)	277

14.6.1	Influence of Chemical Treatment	277
14.7	Effect of Hybridization	279
14.7.1	Fiber Percentage (%)	279
14.8	Effect of Hybridization and Its Application of Nanofiber	281
14.8.1	Effect of Hybridization of Nanofibers Over Mechanical and Tribological Fibers	281
14.8.2	Nano-based Fibers	284
14.8.3	Synthesis of Nanofiber by Using the Electro-spinning Process	285
14.9	Preparation and Characterization of Nanofibers	285
14.9.1	Polyacrylonitrile (PAN) Fibers	285
14.9.2	Alumina Fibers	286
14.9.3	BaTiO ₃ Nanofiber	287
14.10	Applications of Electrospun Nanofibers	287
14.10.1	Nanofibers in Air Filtration	287
14.10.2	Nanofiber in Water Filtration	288
14.10.3	Recycled PET (RPET) Nanofibers for Water Filtration	289
14.10.4	Energy Conversion and Storage Device	290
14.10.5	Nanofibers in Solar Cells	290
14.10.6	Nanofiber-Based Li-S and LiO ₂ Batteries	290
14.11	Conclusions	291
