Abbreviations	v
List of Symbols	vii
Abstract	ix
Kurzfassung	x
1. Introduction	1
2. Exploring the Chemistry of Low-Temperature Ignition by Pressure-Accelerated Dynamics	5
2.1. Methods	10
2.2. Results and Discussion	15
2.3. Conclusions	22
3. Efficient Reaction Space Exploration with ChemTraYzer-TAD	23
3.1. Methods	26
3.2. Results and Discussion	36
3.3. Conclusion	50
4. A ChemTraYzer Study of Chlorinated Dibenzofuran Formation and Decomposition Processes	52
4.1. Methods	55
4.2. Results and Discussion	67

4.3. Conclusion	80
5. Conclusions and Outlook	82
A. Appendix	88
A.1. Supplementary Information to Chapter 2	88
A.1.1. Reaction List	88
A.1.2. Geometries	110
A.1.3. Carbonyl-Peroxide Formation	114
A.1.4. Error Propagation	114
A.1.5. Ignition Delay Times	116
A.2. Supplementary Information to Chapter 3	117
A.2.1. Reaction List	117
A.2.2. R9 TS Geometry	143
A.3. Supplementary Information to Chapter 4	144
A.3.1. Preliminary Force Field Parameters	144
A.3.2. Illustration of the Undertermined Rotational Alignment Problem	151
A.3.3. $\text{H}_2 \rightleftharpoons 2\text{H}$ Reaction Equilibrium	151
A.3.4. TS Snapshot of Reactions Involving Chlorine	152
A.3.5. Reaction List	153
A.4. Discussion of the Consequences of Hypersensitive Reaction Detection for CTY-TAD and CTY TS Searching and Possible Solutions	169
A.5. Source Code Availability	174
A.6. Journal Publications	174
Bibliography	176
