

Contents

1	Introduction	1
1.1	Nonlinear Susceptibility	2
1.2	Coherence Functions	3
1.3	Suppression and Enhancement of FWM Processes	6
1.4	Double Dressing Schemes of Probe and Four-Wave Mixing Fields	8
1.5	Spatial Optical Modulation via Kerr Nonlinearities	10
1.6	Formations and Dynamics of Novel Spatial Solitons	15
	References	18
2	Ultrafast Polarization Beats of Four-Wave Mixing Processes	23
2.1	Four-level Polarization Beats with Broadband Noisy Light	23
2.1.1	Basic Theory	25
2.1.2	FLPB in a Doppler-broadened System	32
2.1.3	Photon-echo	34
2.1.4	Experiment and Result	39
2.2	Ultrafast Sum-frequency Polarization Beats in Twin Markovian Stochastic Correlation	44
2.2.1	Basic Theory	45
2.2.2	Second-order Stochastic Correlation of ASPB	50
2.2.3	Fourth-order Stochastic Correlation of ASPB	62
	References	76
3	Raman, Rayleigh and Brillouin-enhanced FWM Polarization Beats	81
3.1	Attosecond Sum-frequency Raman-enhanced Polarization Beats Using Twin Phase-sensitive Color Locking Noisy Lights	81
3.1.1	Basic Theory of Attosecond Sum-frequency REPB	83

3.1.2	Homodyne Detection of Sum-frequency REPB	89
3.1.3	Heterodyne Detection of Difference-frequency REPB	104
3.2	Competition Between Raman and Rayleigh-enhanced Four- Wave Mixings in Attosecond Polarization Beats	112
3.2.1	Basic Theory	113
3.2.2	Stochastic Correlation Effects of Rayleigh and Raman-enhanced FWM	116
3.2.3	The Raman and Rayleigh-enhanced Nonlinear Susceptibility in cw Limit	124
3.2.4	Homodyne Detection of ASPB	126
3.2.5	Heterodyne Detection of ASPB	132
3.2.6	Discussion and Conclusion	140
3.3	Coexisting Brillouin, Rayleigh and Raman-enhanced Four-Wave Mixings	144
3.3.1	Basic Theory	145
3.3.2	Homodyne Detection of ASPB	148
3.3.3	Heterodyne Detection of ASPB	152
3.3.4	Phase Angle	162
3.3.5	Discussion and Conclusion	164
	References	166
4	Multi-Dressing Four-Wave Mixing Processes in Confined and Non-confined Atomic System	169
4.1	Temporal and Spatial Interference Between Four-Wave Mixing and Six-Wave Mixing Channels	169
4.2	Intermixing Between Four-Wave Mixing and Six-Wave Mixing in a Four-level Atomic System	176
4.2.1	Interplay Between FWM and SWM	177
4.2.2	Discussion	183
4.3	Coexistence of Four-Wave, Six-Wave and Eight-Wave Mixing Processes in Multi-dressed Atomic Systems	183
4.3.1	Parallel and Nested Dressing Schemes	185
4.3.2	Interplay Among Coexisting FWM, SWM and EWM Processes	193
4.4	Controlled Multi-Wave Mixing via Interacting Dark States in a Five-level System	198
4.4.1	Basic Theory	199
4.4.2	Numerical Results	208

4.4.3	Discussion	221
4.5	Polarization Interference of Multi-Wave Mixing in a Confined Five-level System	221
4.5.1	Basic Theory	223
4.5.2	MWM in Long Cells	232
4.5.3	MWM in Ultra-thin and Micrometer Cells	238
4.5.4	Discussion	246
	References	247
5	Enhancement and Suppression in Four-Wave Mixing Processes	253
