

Table of Contents

I. ROGER C.ALPERIN, R.KEITH DENNIS, MICHAEL R.STEIN:

The Non-triviality of $SK_1(\mathbb{Z}\pi)$	1
---	---

II. MAURICE AUSLANDER, IDUN REITEN:

Stable Equivalence of Artin Algebras.	8
---	---

III. GORO AZUMAYA:

Some Properties of TTF-classes.	72
---	----

IV. HYMAN BASS:

Is $SK_1(\mathbb{Z}\pi) = 0$ for π a Finite Abelian Group.	84
--	----

V. R.KEITH DENNIS:

Stability for K_2	85
-------------------------------	----

VI. WILLIAM H.GUSTAFSON:

The Theory of Relative Grothendieck Rings	95
---	----

VII. T.A.HANNULA:

The Morita Context and the Construction of QF Rings	113
---	-----

VIII. STAN KLASA:

On Steinberg Groups	131
-------------------------------	-----

IX. I.REINER, S.ULLOM:

Class Groups of Orders and a Mayer-Vietoris Sequence.	139
---	-----

X. S.K.SEHGAL:

Lie Properties in Modular Group Algebras.	152
---	-----

XI. RICHARD G.SWAN:

K-theory and Algebraic Correspondences.	161
---	-----

XII. ROGER WARE:

The Structure of the Witt Rings and Quotients of Abelian Group Rings	180
--	-----

XIII. TOSHIHIKO YAMADA:

The Schur Subgroup of the Brauer Group 187

XIV. HANS ZASSENHAUS:

On the Embedding of an Order into a Maximal Order. 204
