

CONTENTS

SECTION I

Difference inequalities and their applications to stability problem	1
S. SUGIYAMA	
Selected topics in differential delay equations	16
J. A. YORKE	
Stability for almost periodic systems	29
T. YOSHIKAWA	
Perturbations of Volterra equations and admissibility . .	40
J. A. NOHEL	
On Liapunov-Razumikhin type theorems	54
J. KATO	
On a nonlinear Volterra equation	66
J. J. LEVIN	
Local dynamical systems and their isomorphisms	76
T. URA	
Some results and applications of generalized dynamical systems	91
E. F. INFANTE	
Green functions of pseudoperiodic differential operators .	106
M. URABE	
Almost periodic solutions by the method of averaging . . .	123
G. SEIFERT	

VI

Analytic expressions of solutions with the order of positive powers of x near an irregular type singularity	134
M. IWANO	
Perturbation at an irregular singular point	148
Y. SIBUYA	
On contingent equations	169
N. KIKUCHI	
A nonlinear Sturm-Liouville theorem	182
P. H. RABINOWITZ	
On pursuit and evasion problems	193
Y. SAKAWA	
Disconjugacy and Wronskians	208
P. HARTMAN	
On the Riemann problem on Rieman surfaces	219
T. KIMURA	
Analytic theory of linear differential systems	229
W. A. HARRIS, JR.	
Connection problems for systems of linear differential equations	238
K. OKUBO	

SECTION II

Dirichlet series solutions for certain functional differential equations	249
P. O. FREDERICKSON	
Continuous dependence for some functional differential equations	255
Y. HINO	
On an asymptotic behavior of solutions of differential-difference equations	258
M. KURIHARA	

VII

On a nonlinear difference equation of Briot-Bouquet type . .	262
K. TAKANO	
Invariant measure in the plane	266
J. EGAWA	
On the swirling flow problem	270
P. HARTMAN	
On an extension theorem and its application for turning point problems	272
T. NISHIMOTO	
On Fuch's problem on a torus	277
K. OKAMOTO	
Discontinuous energy functions	281
J. S. MULDOWNNEY	
On the absolute stability of a class of hyperbolic systems	284
T. NAITO	
Oscillations in functional differential equations	289
L. ERBE	
Existence of almost periodic solutions by Liapunov functions	293
F. NAKAJIMA	
Mean stability of quasi-linear systems with random coefficients	298
T. FURUMOCHI	
A nonlinear Sturm-Liouville problem	302
J. W. MACKI and P. WALTMAN	
Initial value problem of an ordinary differential equation of the second order	305
K. TAKAHASI	
Stokes phenomenon for general linear ordinary differential equations with two singular points	310
M. KHONO	

VIII

On an asymptotic expansion of solutions of Orr-Sommerfeld type equation	315
M. NAKANO and T. NISHIMOTO	
On periods of periodic solutions of a certain nonlinear differential equation	320
S. FURUYA	
A bibasic functional equation	324
W. H. ABDI	
List of Participants	329
