

TABLE OF CONTENTS

<u>INTRODUCTION</u>	1
<u>LEITFADEN</u>	3
<u>Chapter I UNRAMIFIED MORPHISMS</u>	
I.1 Derivations and differentials	4
I.2 Unramified morphisms	7
I.3 Unramified algebras over a field	11
I.4 Cartier's equality	13
I.5 Separable field extensions	15
I.6 π_0 and separability	18
I.7 π_0 of algebras over a field	19
I.8 Geometrically irreducible algebras	21
I.9 Irreducible components and base extension	24
I.C Multiplicative coalgebras	26
<u>Chapter II SMOOTH MORPHISMS</u>	
II.1 Smooth functors	33
II.2 Infinitesimal extensions	36
II.3 The (truncated) cotangent complex	37
II.4 Jacobian criterion for smoothness	39
II.5 Cohen's theorem	42
II.6 Smooth localities over a field	43
II.7 Dimension formulas	46
II.8 Special criterionsfor smooth localities (Cartier's theorem)	48
II. Appendix F. Relative finiteness conditions	49
II. Appendix T. Tangent spaces	52

Chapter III ETALE MORPHISMS

III.1	Etale morphisms	63
III.2	Local structure theorem	63
III.3	Applications to smooth morphisms	65
III.4	Grothendieck-Hensel Lemma	66
III.5	Henselian local rings	67
III.6	Henselization of a local ring	71
III.7	Newton's method	71
III.8	Etale algebras over a local, normal domain	74
III.9	Local ramification theory	79
III.10	Ramification theory for normal domains $(\sum e_i f_i = n)$	80
III.R	Topology on rational points	83

Chapter IV SOME FUNDAMENTAL THEOREMS

IV.1	Hilbert's Nullstellensatz	90
IV.2	Zariski's main theorem	93
IV.3	Chevalley's constructibility theorem	96
IV.C	The analytic case	99
