

CONTENTS

Introduction	1
§0. Iterated loop spaces	11
§1. The inclusion $X \rightarrow \Omega^n \Sigma^n X$	26
§2. The map $F_n(X) \rightarrow \Omega F_{n-1}(\Sigma X)$	34
§3. The cohomology of the F_n	37
§4. The structure of iterated loop spaces in the metastable range. .	44
 <u>PART II.</u>	
§6. An unstable Adams spectral sequence.	51
§7. The loop space functor for resolutions	56
§8. The metastable exact sequence	61
§9. Calculating the groups $\text{Ext}_{G(2)}^{i,j}(H^*(F_L)/A, Z_2)$	70
 <u>PART III. Applications and Examples</u>	
§10. Calculations of the stable homotopy of the $K(\pi, n)$'s	75
§11. Some calculations of the stable homotopy groups for the $K(Z, n)$. .	81
§12. An example for the metastable exact sequence.	91
§13. Further calculations for some truncated projective spaces . . .	98
