

TABLE OF CONTENTS

CHAPTER 0.	Preliminaries -----	1
Section 1.	About dense subcategories and the extension of natural transformations--	1
CHAPTER I.	The category of discrete semilattices and the category of compact zero-dimensional semilattices -----	5
Section 1.	The category of discrete semilattices -----	5
Section 2.	The category of compact zero- dimensional semilattices -----	13
Section 3.	Characters and the duality between $\underline{S}$ and $\underline{Z}$ -----	17
Section 4.	General consequences of duality -----	21
	HISTORICAL NOTES FOR CHAPTERS 0 AND I -----	27
CHAPTER II.	The character theory of compact and discrete semilattices -----	28
Section 1.	The category of zero-dimensional compact semilattices -----	28
Section 2.	Characters and filters on discrete semilattices -----	34
Section 3.	The algebraic characterization of the category $\underline{Z}$ -----	37
	HISTORICAL NOTES FOR CHAPTER II -----	50
CHAPTER III.	Application of duality to lattice theory--	53
Section 1.	Primes and duality -----	53
Section 2.	Duality and Boolean lattices -----	78
Section 3.	Projectives and injectives in $\underline{S}$ and $\underline{Z}$ -----	85
	HISTORICAL NOTES FOR CHAPTER III -----	88
CHAPTER IV.	Applications of duality to the structure of compact zero-dimensional semilattices--	92
Section 1.	Cardinality invariants -----	92
Section 2.	Chains and stability -----	95

Section 3. Extremally disconnected	
compact semilattices -----	105
HISTORICAL NOTES FOR CHAPTER IV -----	108
BIBLIOGRAPHY -----	109
NOTATION -----	115
INDEX -----	118
