

CONTENTS

L.E. Payne:

Some general remarks on improperly posed problems for
partial differential equations 1

R.J. Knops:

Logarithmic convexity and other techniques applied to
problems in continuum mechanics 31

D.L. Colton:

Cauchy's problem and the analytic continuation of solutions
to elliptic equations 55

R.H. Dyer:

Some properties of solutions of the Navier-Stokes equations 67

K. Miller:

Non-unique continuation for certain ODE's in Hilbert space
and for uniformly parabolic and elliptic equations in self-
adjoint divergence form 85

H.A. Levine:

Logarithmic convexity and the Cauchy problem for
 $P(t)u_{tt} + M(t)u_t + N(t)u = 0$ in Hilbert space 102

K. Miller:

Stabilized quasi-reversibility and other nearly-best-possible
methods for non-well-posed problems 161
