Outline	1
<u>Chapter I</u> : A priori estimates for solutions of linear elliptic functional equations with constant coefficients	13
§ 1. Some definitions. Formulation of a basic a priori estimate	13
§ 2. Construction of certain "testing functions". Analytic tools	21
§ 3. Proofs of local and global a priori estimates and regularity theorems	41
<u>Chapter II</u> : A representation for continuous linear functionals on $W_0^{m,p}(G)$ ($1 < p < \infty$) and its applications: A generalization of Gårding's inequality and existence theorems	84
§ 4. A representation for continuous linear functionals on $W_0^{m,p}(G)$ ($1 < p < \infty$)	85
§ 5. Bilinear forms and a generalization of the Lax-Milgram-theorem	97
§ 6. Some coerciveness inequalities generalizing Gårding's inequality	101
§ 7. Existence theorems in the case of uniformly strongly elliptic Dirichlet bilinear forms	121
<u>Chapter III</u> : Regularity and existence theorems for uniformly elliptic functional equations	133
§ 8. Some properties of the spaces $W^{k,p}(G)$	134
§ 9. Differentiability theorems	137
§ 10. Fredholm's alternative for uniformly elliptic functional equations	163
§ 11. Further regularity theorems	186

Appendix 1	200
Appendix 2	228
List of notations	230
Bibliography	234

At this point I want to thank my academic teachers Prof. E. Heinz and Prof. E. Wienholtz. Further I want to thank the editors of the "Lecture Notes" Series, Prof. A. Dold and Prof. B. Eckmann, and Springer-Verlag for publishing my manuscript in this series. Last but not least I thank Mr. G. Abersfelder for typing the manuscript.
