

# Table of Contents

|                                                                                                                   |     |
|-------------------------------------------------------------------------------------------------------------------|-----|
| Reputation Based Trust Model for Grid with Enhanced Reliabilty . . . . .                                          | 1   |
| <i>P. Vivekananth</i>                                                                                             |     |
| Biomedical Resource Discovery Considering Semantic Heterogeneity in<br>Data Grid Environments . . . . .           | 12  |
| <i>Imen Ketata, Riad Mokadem, and Franck Morvan</i>                                                               |     |
| On Combining Higher-Order MAP-MRF Based Classifiers for Image<br>Labeling . . . . .                               | 25  |
| <i>Alexandre L.M. Levada, Nelson D.A. Mascarenhas, and<br/>Alberto Tannús</i>                                     |     |
| Integrated Cooperative Framework for Project Resources Allocation . . .                                           | 40  |
| <i>Mihaela Brut, Jean-Luc Soubie, and Florence Sèdes</i>                                                          |     |
| SNPs Classification: Building Biological High-Level Knowledge Using<br>Genetic Algorithms . . . . .               | 50  |
| <i>Andre Bevilacqua, Fabricio Alves Rodrigues, and<br/>Laurence Rodrigues do Amaral</i>                           |     |
| A Comparison of Clustering Algorithms for Data Streams . . . . .                                                  | 59  |
| <i>Cássio M.M. Pereira and Rodrigo F. de Mello</i>                                                                |     |
| Approach Space Framework for Image Database Classification . . . . .                                              | 75  |
| <i>Sheela Ramanna and James F. Peters</i>                                                                         |     |
| Learning Temporal Interval Relations Using Inductive Logic<br>Programming . . . . .                               | 90  |
| <i>Maria do Carmo Nicoletti, Flávia O.S. de Sá Lisboa, and<br/>Estevam Rafael Hruschka Jr.</i>                    |     |
| Power Spectral Density Technique for Fault Diagnosis of an<br>Electromotor . . . . .                              | 105 |
| <i>Hojjat Ahmadi and Zeinab Khaksar</i>                                                                           |     |
| Efficient ID-Based Multi-proxy Signature Scheme from Bilinear Pairing<br>Based on <i>k-plus</i> Problem . . . . . | 113 |
| <i>Shivendu Mishra, Rajeev Anand Sahu, Sahadeo Padhye, and<br/>Rama Shankar Yadav</i>                             |     |
| Decision Tree Technique for Customer Retention in Retail Sector . . . . .                                         | 123 |
| <i>Rose Tinabo</i>                                                                                                |     |

Separation between Arabic and Latin Scripts from Bilingual Text Using  
Structural Features..... 132  
    *Sofiene Haboubi, Samia Snoussi Maddouri, and Hamid Amiri*

Introducing a New Agile Development for Web Applications Using a  
Groupware as Example ..... 144  
    *Vinicius Pereira and Antonio Francisco do Prado*

Hardware/Software Co-design for Image Cross-Correlation ..... 161  
    *Mauricio A. Dias and Fernando S. Osorio*

**Author Index..... 177**
