

TABLE OF CONTENTS

<u>Chapter I</u> - Global Error Estimates	1
1. Introduction	1
2. Two Interpolation Methods.	4
3. Some Quadrature Relations.	11
4. The Continuous Time Collocation Method	13
5. Discretization in Time by Finite Differences	21
6. Discretization in Time by Collocation.	31
7. Some Extensions.	60
<u>Chapter II</u> - Superconvergence Estimates at the Knots	63
8. Introduction	63
9. A Two-Point Boundary Problem	65
10. Continuous Time Collocation.	77
11. Collocation in Space and Time.	88
Appendix	98
<u>Chapter III</u> - Local Superconvergence by Local Refinement	99
12. Introduction	99
13. Local Refinement for the Two-Point Boundary Problem.	99
14. Local Refinement for Parabolic Problems.	104
<u>Chapter IV</u> - A Smoothed Collocation Method and Applications to Eigen- system Approximation	109
15. Introduction	109
16. A Smoothed Collocation Method for the Two-Point Boundary Problem . .	110
17. The Eigensystem Estimates.	123
18. A Smoothed Collocation Method for Parabolic Equations.	131
