Part 3	Chemical Properties and Experimental Techniques	1
Chapter 13	Analytical Techniques: Their Precision and Accuracy	3
13.1	Introduction	3
13.2	Techniques: Specific Applications to Feldspars	4
13.2.1	Gravimetric and Volumetric Analysis: Colorimetric Methods	4
13.2.2	X-Ray Fluorescence and Electron Microprobe Spectrographic Analysis	8
13.2.3	Optical Spectrography: Flame Photometer . .	10
13.2.4	Radio-Activation Analysis	11
13.2.5	Mass Spectrometer Analysis	11
	References	12
Chapter 14	Chemical Properties	15
14.1	General	15
14.1.1	Brief History	15
14.1.2	Basic Stoichiometry: Deviations Therefrom .	16
14.1.3	Theoretical Models on Chemical Substitution and Distribution	18
14.2	Major Chemical Substitutions	21
14.3	Experimental Data on Element Distribution	23
14.3.1	Rb, Cs, Sr, and Ba between Two Feldspars . .	23
14.3.2	Cs and Rb between Feldspar and Aqueous Fluid	24
14.3.3	Sr and Ba between Plagioclase and Silicate Liquid	26
14.3.4	Y and REE between Plagioclase and Silicate Liquid	29
14.3.5	REE between Plagioclase and Aqueous Fluid	33
14.4	Chemical Substitution in Natural Feldspars	33
14.4.1	Introduction	33
14.4.2	Substitution in T Sites	55
14.4.3	Substitution in M Sites	65
14.5	Isotope Distribution	119
14.5.1	Oxygen Isotopes	119
14.5.2	Lead Isotopes	121
14.5.3	K/Ar Isotopic Ratio	123
14.5.4	Rb/Sr Isotopic Ratio	126
	References	127

Part 4	Growth, Diffusion, Defects and Intergrowths	145
Chapter 15	General Review of Phenomena and Processes	147
	References	150
Chapter 16	Diffusion	152
	16.1 General	152
	16.2 Tetrahedral Atoms	154
	16.2.1 Dry Conditions	154
	16.2.2 Hydrothermal Conditions	158
	16.3 Oxygen Atoms	163
	16.3.1 Exchange with Pure Water	163
	16.3.2 Exchange with Salt Solutions	164
	16.4 M Atoms	167
	16.4.1 Dry Conditions	167
	16.4.2 Hydrothermal Conditions	177
	16.5 Argon	181
	16.5.1 Diffusion in Anorthite	182
	16.5.2 Diffusion in K-rich Feldspars	183
	16.6 Diffusion, Viscosity and Crystallization Kinetics of Liquid and Glass	188
	16.6.1 Diffusion	188
	16.6.2 Viscosity	189
	16.6.3 Crystallization Kinetics	190
	16.7 General Discussion	191
	References	193
Chapter 17	Growth and Defects	196
	17.1 Growth Mechanisms	196
	17.1.1 Experimental Evidence of Growth Mechanisms and on Growth Features	199
	17.1.2 Primary Growth from Magmas and Other Fluids	201
	17.1.3 Primary Growth in the Solid State	204
	17.2 Chemical Zoning	206
	17.2.1 Geometrical Description and Nomenclature	207
	17.2.2 Syntheses of Zoned Feldspars	211
	17.2.3 Zoning in Feldspars of Igneous Rocks	212
	17.2.4 Zoning in Feldspars of Metamorphic Rocks	224
	17.2.5 Theories of Zoning and Some Further Observations	232
	17.3 Tracht, Morphology, Habit	247
	17.3.1 Data on Tracht of Synthetic Crystals	253
	17.3.2 Data on Tracht of Natural Feldspars	254
	17.3.3 Theories of Feldspar Tracht: Suggestions for Further Study	272
	17.4 Miscellaneous Textures	274
	17.4.1 Oriented Plagioclase Inclusions in K-feldspars	274
	17.4.2 Surface Attachments of Feldspars	280

	17.4.3 Incomplete Rims	282
	17.4.4 Coarse Textures Attributed to Replacement	286
	17.5 Dislocations and Etch Features	293
	References	294
Chapter 18	Twins and Related Structures	303
	18.1 Formal Geometry of Twins	304
	18.2 Name, Operation and Structural Explanation of Feldspar Twins	306
	18.2.1 Normal Twins	306
	18.2.2 Parallel Twins	312
	18.2.3 Edge-normal Twins	322
	18.2.4 Special Terms and Twin Combinations	326
	18.3 Twin-related Structures	331
	18.3.1 Periodic Twinning	331
	18.3.2 M-type Twinning, the Diagonal Association, Domain- and Distorted-twinning	333
	18.3.3 Glide Twinning, Pseudo-Twins, Slip Bands	338
	18.3.4 "Pericline"-twinning in Pericline and Other Plagioclase: Genetic Significance of Compo- sition Plane	340
	18.4 Genesis of Twins	341
	18.4.1 Twinning Mechanisms and Nomenclature	341
	18.4.2 Twinning Mechanisms and Theories of Twin Frequency	342
	18.4.3 Morphological and Other Criteria for Recog- nition of Twin Mechanisms	345
	18.5 Plagioclase Twins	351
	18.5.1 Pericline Composition Plane	351
	18.5.2 Laboratory Production of Twins	353
	18.5.3 Transformation Twinning	356
	18.5.4 Mechanical Twinning	357
	18.5.5 Growth Twinning	360
	18.5.6 Some Studies of Plagioclase Twinning in Rocks	363
	18.5.7 Frequency of Twinning in Plagioclase	369
	18.5.8 Identification of Plagioclase Twins	377
	18.5.9 Etch-pattern and Twinning	379
	18.6 Alkali Feldspar Twins	380
	18.6.1 Monoclinic Alkali Feldspars	380
	18.6.2 Twinning in Microcline	381
	18.6.3 Twinning in Anorthoclase	388
	References	390
Chapter 19	Intimate Feldspar Intergrowths	399
	19.1 Perthites	401
	19.1.1 Classifications and Textures	402
	19.1.2 Chemical Composition and Crystal Structure	440
	19.1.3 Heating, Ion-exchange and Synthesis Experi- ments	489

19.1.4	Proposed Mechanisms of Formation	493
19.1.5	Occurrence in Rocks, and Critical Review of Mechanisms	504
19.1.6	Iridescence of Perthite	516
19.2	Intergrowths of Plagioclase	519
19.2.1	The Peristerite Intergrowth in Acid Plagioclase	519
19.2.2	The Bøggild Intergrowth in Intermediate Plagioclase	532
19.2.3	The Huttenlocher Intergrowth in Basic Plagioclase	540
	References	544
Chapter 20	Intergrowths of Feldspars with Other Minerals	553
20.1	Myrmekite	554
20.1.1	Simplified Description	554
20.1.2	Historical Review	555
20.1.3	Critique of Models for Myrmekite	577
20.2	Spherulites, Granophyre, and Graphic Granite	581
20.2.1	General Statement	581
20.2.2	Experimental Synthesis	582
20.2.3	Spherulites in Devitrified Rocks	585
20.2.4	Granophyric Intergrowths	586
20.2.5	Graphic Granite	593
20.3	Nepheline-Feldspar Intergrowths	608
20.3.1	Nepheline-Alkali Feldspar Myrmekite in Larvikite	608
20.3.2	Nepheline-Plagioclase Vermicular Intergrowths	610
20.3.3	Pseudoleucite	611
20.3.4	Anhedral Nepheline-K-feldspar Intergrowths	613
20.4	Aventurine and Red Clouded Feldspar	614
20.4.1	Nature of Aventurine and Sunstone	614
20.4.2	Nature of Red Clouded Feldspars	618
20.4.3	Origin of Aventurine and Red Clouded Feldspar	619
20.5	Clouded Feldspar	623
20.5.1	Early Observations and Ideas on Clouded Plagioclase	623
20.5.2	Later Observations and Ideas on Clouded Plagioclase: General	624
20.5.3	Clouded Plagioclase in Anorthositic Rocks.	627
20.5.4	Critique.	629
20.6	Miscellaneous Intergrowths with Other Minerals	630
20.6.1	Feldspar-Olivine	631
20.6.2	Feldspar-Pyroxene	631
20.6.3	Feldspar-Mica	632

20.6.4	Feldspar-Sillimanite-Corundum	633
20.6.5	Miscellaneous	635
20.6.6	Fingerprint Texture of Feldspar and Glass . .	635
20.6.7	Feldspar-Spinel	636
20.6.8	Feldspar-Amphibole	637
	References	637
