T. Tomita · O. Trujillo-Cenoz · G. Westheimer

Edited by

M. G. F. Fuortes

With 342 Figures

Springer-Verlag Berlin · Heidelberg · New York 1972

Contents

	Introduction. By H. K. Hartline	1
Chapter 1	The Structural Organization of the Compound Eye in Insects. By O. TRUJILLO-CENÓZ. With 36 Figures	5
Chapter 2	Rods and Cones. By A. I. COHEN. With 10 Figures.	63
Chapter 3	The Morphological Organization of the Vertebrate Retina. By W. K. STELL. With 28 Figures	111
Chapter 4	Interactions between Light and Matter. By D. MAUZERALL. With 6 Figures	215
Chapter 5	The Structure and Reactions of Visual Pigments. By A. KROFF. With 11 Figures	239
Chapter 6	Generator Potentials in Invertebrate Photoreceptors. By M. G. F. FUORTES and P. M. O'BRYAN. With 28 Figures	279
Chapter 7	Responses to Single Photons. By M. G. F. FUORTES and P. M. O'BRYAN. With 14 Figures	321
Chapter 8	Interpretation of Generator Potentials. By J. Z. LEVINSON. With 9 Figures	339
Chapter 9	Optical Properties of the Compound Eye. By C. G. BERN- HARD, G. GEMNE and G. SEITZ. With 11 Figures	357
Chapter 10	Inhibitory Interaction in the Retina of Limulus. By H. K. HARTLINE and F. RATLIFF. With 53 Figures	381
Chapter 11	Optical Properties of Vertebrate Eyes. By G. WESTHEIMER. With 18 Figures	449
Chapter 12	Light-Induced Potential and Resistance Changes in Verte- brate Photoreceptors. By T. TOMITA. With 18 Figures	483
Chapter 13	S-Potentials. By P. GOURAS. With 12 Figures	513
Chapter 14	Receptive Fields of Retinal Ganglion Cells. By W. R. LEVICK. With 14 Figures	531

Chapter 15	Retinal Mechanisms of Colour Vision. By I. ABRAMOV. With 11 Figures	567
Chapter 16	Light and Dark Adaption. By P. GOURAS. With 13 Figures	609
Chapter 17	The Electroretinogram, as Analyzed by Microelectrode Studies. By T. TOMITA. With 20 Figures	635
Chapter 18	Retinal Metabolism in Dark and Light. By W. SICKEL. With 30 Figures	667
