

Contents

Foreword — V

Der-Chen Chang, Shu-Cheng Chang, Yingbo Han, and Jingzhi Tie
Yau's conjecture on the dimension of harmonic polynomials — 1

Nageswari Shanmugalingam
On Carrasco Piaggio's theorem characterizing quasisymmetric maps from compact doubling spaces to Ahlfors regular spaces — 23

Tuoc Phan
On trace theorems for weighted mixed-norm Sobolev spaces and applications — 49

Juncheng Wei and Yuanze Wu
Sharp stability of the logarithmic Sobolev inequality in the critical point setting — 77

Qinfeng Li and Changyou Wang
On a variational problem of nematic liquid crystal droplets — 103

Petteri Harjulehto and Ritva Hurri-Syrjänen
Estimates for the variable order Riesz potential with applications — 127

Yoshihiro Sawano and Kazuki Kobayashi
A remark on the atomic decomposition in Hardy spaces based on the convexification of ball Banach spaces — 157

Bernhard Ruf
A Bliss–Adams inequality — 179

Cristina Tarsi
Trudinger-type inequalities in \mathbb{R}^N with radial increasing mass-weight — 197

Liguang Liu and Jie Xiao
In response to David R. Adams' October 12, 2001, letter — 215

Augusto C. Ponce and Daniel Spector
Some remarks on capacitary integrals and measure theory — 235

VIII — Contents

Javier Martínez Perales and Carlos Pérez

**Remarks on vector-valued Gagliardo and Poincaré–Sobolev-type inequalities
with weights — 265**

Index — 287
