

Contents

<u>Chapter 0:</u>	<u>Preliminaries</u>	1
§1.	Introduction	1
§2.	Measure Theory	3
§3.	Hilbert Spaces	8
§4.	Haar Measure	9
§5.	Character Theory	10
§6.	Endomorphisms of Tori	12
<u>Chapter 1:</u>	<u>Measure-Preserving Transformations</u>	16
§1.	Examples	16
§2.	Problems in Measure Theoretic Ergodic Theory	19
§3.	Recurrence	20
§4.	Ergodicity	21
§5.	The Ergodic Theorem	29
§6.	Mixing	37
<u>Chapter 2:</u>	<u>Isomorphism and Spectral Invariants</u>	51
§1.	Isomorphism of Measure-Preserving Transformations	51
§2.	Conjugacy of Measure-Preserving Transformations	53
§3.	Spectral Isomorphism	54
§4.	Spectral Invariants	57
§5.	Examples	59
<u>Chapter 3:</u>	<u>Measure-Preserving Transformations</u>	63
	<u>with Pure Point Spectrum</u>	
§1.	Eigenfunctions	63
§2.	Pure Point Spectrum	64
§3.	Group Rotations	67
<u>Chapter 4:</u>	<u>Entropy</u>	70
§1.	Partitions and Subalgebras	70
§2.	Entropy	72
§3.	Conditional Entropy	76
§4.	Properties of $h(T, A)$	80
§5.	Properties of $h(T)$	83
§6.	Examples	92
§7.	How good an invariant is entropy?	96
§8.	Bernoulli and Kolmogorov Automorphisms	98
§9.	Finsler Algebra	107
§10.	Sequence Entropy	108
§11.	Comments	109
§12.	Non-invertible Transformations	110

<u>Chapter 5: Topological Dynamics</u>	112
§0. Introduction	112
§1. Minimality	113
§2. Topological Transitivity	117
§3. Topological Conjugacy and Discrete Spectrum	122
§4. Invariant Measures for Homeomorphisms	128
<u>Chapter 6: Topological Entropy</u>	140
§1. Definition by Open Covers	140
§2. Bowen's Definition	146
§3. Connections with Measure Theoretic Entropy	155
§4. Topological Entropy of Linear Maps and Toral Affines	160
§5. Expansive Homeomorphisms	168
§6. Examples	182
<u>Bibliography</u>	185
Index	197
