Preface — VII

1 Some background in differential geometry — 1

- 1.1 Curves in $\mathbb{R}^n$ — 1
- 1.2 Surfaces in $\mathbb{R}^3$ and $\mathbb{R}^n$ — 2
- 1.3 The Gauss–Bonnet theorem — 9
- 1.4 The abstract surfaces — 15

2 Analysis and geometry of complex functions — 19

- 2.1 Holomorphic functions — 19
- 2.2 Harmonic functions — 24
- 2.3 The Ahlfors–Schwarz lemma and the negative curvature method — 25
- 2.4 The Riemann surfaces — 35
- 2.5 The theory of algebraic curves — 38

3 Minimal surfaces in $\mathbb{R}^3$ — 47

- 3.1 The minimal surfaces — 47
- 3.2 The Weierstrass–Enneper representation — 50
- 3.3 Gauss maps of complete minimal surfaces in $\mathbb{R}^3$ — 58
- 3.4 Minimal surfaces with finite total curvatures — 70

4 The Nevanlinna theory — 74

- 4.1 Nevanlinna theory of meromorphic functions — 74
- 4.2 Cartan’s second main theorem for holomorphic curves — 89
- 4.3 The degenerate case — 112
- 4.4 Holomorphic curves through Ahlfors’ negative curved method — 121

5 Gauss maps of minimal surfaces in $\mathbb{R}^m$ — 135

- 5.1 Minimal surfaces in $\mathbb{R}^m$ — 135
- 5.2 Value distributions of the (generalized) Gauss maps of complete minimal surfaces in $\mathbb{R}^m$ — 140
- 5.3 The Gauss curvature estimate — 145
- 5.4 Gauss maps of minimal surfaces in $\mathbb{R}^m$ with finite total curvature — 155

6 Nevanlinna theory on the open ball $B(R_0) \subset \mathbb{C}^n$ and the nonintegrated defect relation — 160

- 6.1 Meromorphic functions on $B(R_0) \subset \mathbb{C}^n$ — 160
- 6.2 Nevanlinna theory on $B(R_0) \subset \mathbb{C}^n$ — 167
- 6.3 The nonintegrated defect relation — 174
