

Table of Contents

0. INTRODUCTION	1
1. GIBBS MEASURES	
A. Gibbs distributions	4
B. Ruelle's Perron-Frobenius theorem	13
C. Construction of Gibbs measures	21
D. Variational principle	28
E. Further properties	37
2. GENERAL THERMODYNAMIC FORMALISM	
A. Entropy	45
B. Pressure	50
C. Variational Principle	56
D. Equilibrium states	64
3. AXIOM A DIFFEOMORPHISMS	
A. Definitions	68
B. Spectral decomposition	72
C. Markov partitions	78
D. Symbolic dynamics	84
4. ERGODIC THEORY OF AXIOM A DIFFEOMORPHISMS	
A. Equilibrium states for basic sets	90
B. The case $\phi = \phi^{(u)}$	95
C. Attractors and Anosov diffeomorphisms	101
