

Table of Contents

Introduction	1
1 Motion of a Point Mass	
1.1 Kinematics	5
1.1.1 Velocity and Acceleration	5
1.1.2 Velocity and Acceleration in Cartesian Coordinates	7
1.1.3 Rectilinear Motion	7
1.1.4 Planar Motion, Polar Coordinates	23
1.1.5 Three-Dimensional Motion, Serret-Frenet Frame	30
1.2 Kinetics	36
1.2.1 Newton's Laws	36
1.2.2 Free Motion, Projectiles	38
1.2.3 Constrained Motion	42
1.2.4 Resistance/Drag Forces	45
1.2.5 Impulse Law and Linear Momentum, Impact	52
1.2.6 Angular Momentum Theorem	58
1.2.7 Work-Energy Theorem, Potential Energy, Conservation of Energy	63
1.2.8 Universal Law of Gravitation, Planetary and Satellite Motion	72
1.3 Supplementary Examples	77
1.4 Summary	85
2 Dynamics of Systems of Point Masses	
2.1 Fundamentals	89
2.2 Linear Momentum for a System of Point Masses	94
2.3 Angular Momentum Theorem for a System of Point Masses	97
2.4 Work-Energy Theorem and Conservation of Energy for a System of Point Masses	101
2.5 Central Impact	105
2.6 Bodies with Variable Mass	115
2.7 Supplementary Examples	122
2.8 Summary	126

3	Dynamics of Rigid Bodies	
3.1	Kinematics	129
3.1.1	Translation	129
3.1.2	Rotation	130
3.1.3	General Motion.....	133
3.1.4	Instantaneous Center of Rotation.....	141
3.2	Kinetics of the Rotation about a Fixed Axis.....	147
3.2.1	Principle of Angular Momentum.....	147
3.2.2	Mass Moment of Inertia	149
3.2.3	Work, Energy, Power	153
3.3	Kinetics of a Rigid Body in Plane Motion	158
3.3.1	Principles of Linear and Angular Momentum.....	158
3.3.2	Impulse Laws, Work-Energy Theorem and Conservation of Energy	169
3.3.3	Eccentric Impact	174
3.4	Kinetics of a Rigid Body in Three Dimensional Motion .	182
3.4.1	Principles of Linear and Angular Momentum.....	183
3.4.2	Angular Momentum, Inertia Tensor, Euler's Equations..	185
3.4.3	Support Reactions in Plane Motion	194
3.4.4	The Torque-Free Gyroscope	197
3.5	Supplementary Examples	199
3.6	Summary	207
4	Principles of Mechanics	
4.1	Formal Reduction of Kinetics to Statics.....	211
4.2	D'Alembert's Principle.....	216
4.3	Lagrange Equations of the 2nd Kind.....	220
4.4	Supplementary Examples	230
4.5	Summary	234
5	Vibrations	
5.1	Basic Concepts	237
5.2	Free Vibrations	240
5.2.1	Undamped Free Vibrations.....	240
5.2.2	Spring Constants of Elastic Systems	246
5.2.3	Damped Free Vibrations.....	254
5.3	Forced Vibrations	264

5.3.1	Undamped Forced Vibrations.....	264
5.3.2	Damped Forced Vibrations.....	269
5.4	Systems with two Degrees of Freedom	278
5.4.1	Free Vibrations	278
5.4.2	Forced Vibrations	287
5.5	Supplementary Examples	290
5.6	Summary	296
6	Non-Inertial Reference Frames	
6.1	Kinematics of Relative Motion	299
6.1.1	Translating Reference Frames	299
6.1.2	Translating and Rotating Reference Frames	300
6.2	Kinetics of Relative Motion	305
6.3	Supplementary Examples	312
6.4	Summary	315
7	Numerical Simulation	
7.1	Introduction.....	319
7.2	First-Order Initial-Value Problems.....	319
7.3	Second-Order Initial-Value Problems.....	329
7.4	Supplementary Examples	342
7.5	Summary	350
A	Numerical Integration	351
Index		355
