Preface — V

About the Authors — VII

1 Difference methods for the Fisher equation — 1

- 1.1 Introduction — 1
- 1.2 Notation and lemmas — 3
- 1.3 Forward Euler difference scheme — 11
 - 1.3.1 Derivation of the difference scheme — 11
 - 1.3.2 Solvability and convergence of the difference scheme — 12
- 1.4 Backward Euler difference scheme — 14
 - 1.4.1 Derivation of the difference scheme — 14
 - 1.4.2 Existence and convergence of the difference solution — 16
- 1.5 Crank–Nicolson difference scheme — 18
 - 1.5.1 Derivation of the difference scheme — 19
 - 1.5.2 Existence and convergence of the difference solution — 20
- 1.6 Fourth-order compact difference scheme — 22
 - 1.6.1 Derivation of the difference scheme — 22
 - 1.6.2 Existence and convergence of difference solution — 23
- 1.7 Three-level linearized difference scheme — 27
 - 1.7.1 Derivation of the difference scheme — 27
 - 1.7.2 Existence and convergence of the difference solution — 31
- 1.8 Numerical experiments — 36
- 1.9 Summary and extension — 38

2 Difference methods for the Burgers' equation — 41

- 2.1 Introduction — 41
- 2.2 Two-level nonlinear difference scheme — 43
 - 2.2.1 Derivation of the difference scheme — 43
 - 2.2.2 Conservation and boundedness of the difference solution — 44
 - 2.2.3 Existence and uniqueness of the difference solution — 46
 - 2.2.4 Convergence of the difference solution — 49
- 2.3 Three-level linearized difference scheme — 54
 - 2.3.1 Derivation of the difference scheme — 54
 - 2.3.2 Existence and uniqueness of the difference solution — 55
 - 2.3.3 Conservation and boundedness of the difference solution — 56
 - 2.3.4 Convergence of the difference solution — 57
- 2.4 Hopf–Cole transformation and fourth-order difference scheme — 61
 - 2.4.1 Hopf–Cole transformation — 61
 - 2.4.2 Derivation of the difference scheme — 63

| | | |
|----------|--|------------|
| 2.4.3 | Existence and uniqueness of the difference solution — | 65 |
| 2.4.4 | Convergence of the difference solution — | 67 |
| 2.4.5 | Calculation of the solution of the original problem — | 69 |
| 2.5 | Fourth-order compact two-level nonlinear difference scheme — | 70 |
| 2.5.1 | Derivation of the difference scheme — | 73 |
| 2.5.2 | Conservation and boundedness of the difference solution — | 74 |
| 2.5.3 | Existence and uniqueness of the difference solution — | 75 |
| 2.5.4 | Convergence of the difference solution — | 79 |
| 2.5.5 | Stability of the difference solution — | 84 |
| 2.6 | Numerical experiments — | 87 |
| 2.7 | Summary and extension — | 88 |
| 3 | Difference methods for the regularized long-wave equation — | 91 |
| 3.1 | Introduction — | 91 |
| 3.2 | Two-level nonlinear difference scheme — | 92 |
| 3.2.1 | Derivation of the difference scheme — | 92 |
| 3.2.2 | Existence of the difference solution — | 93 |
| 3.2.3 | Conservation and boundedness of the difference solution — | 94 |
| 3.2.4 | Uniqueness of the difference solution — | 95 |
| 3.2.5 | Convergence of the difference solution — | 96 |
| 3.3 | Three-level linearized difference scheme — | 98 |
| 3.3.1 | Derivation of the difference scheme — | 98 |
| 3.3.2 | Conservation and boundedness of the difference solution — | 99 |
| 3.3.3 | Existence and uniqueness of the difference solution — | 100 |
| 3.3.4 | Convergence of the difference solution — | 100 |
| 3.4 | Numerical experiments — | 103 |
| 3.5 | Summary and extension — | 104 |
| 4 | Difference methods for the Korteweg–de Vries equation — | 106 |
| 4.1 | Introduction — | 106 |
| 4.2 | First-order in space two-level nonlinear difference scheme — | 107 |
| 4.2.1 | Derivation of the difference scheme — | 107 |
| 4.2.2 | Existence of the difference solution — | 110 |
| 4.2.3 | Conservation and boundedness of the difference solution — | 112 |
| 4.2.4 | Convergence of the difference solution — | 113 |
| 4.3 | First-order in space three-level linearized difference scheme — | 115 |
| 4.3.1 | Derivation of the difference scheme — | 115 |
| 4.3.2 | Existence and uniqueness of the difference solution — | 116 |
| 4.3.3 | Conservation and boundedness of the difference solution — | 117 |
| 4.3.4 | Convergence of the difference solution — | 118 |
| 4.4 | Second-order in space two-level nonlinear difference scheme — | 123 |
| 4.4.1 | Derivation of the difference scheme — | 123 |

| | | |
|-------|--|-----|
| 4.4.2 | Existence of the difference solution — | 125 |
| 4.4.3 | Conservation and boundedness of the difference solution — | 127 |
| 4.4.4 | Convergence and uniqueness of the difference solution — | 128 |
| 4.5 | Second-order in space three-level linearized difference scheme — | 137 |
| 4.5.1 | Derivation of the difference scheme — | 137 |
| 4.5.2 | Conservation and boundedness of the difference solution — | 139 |
| 4.5.3 | Existence and uniqueness of the difference solution — | 141 |
| 4.5.4 | Convergence of the difference solution — | 143 |
| 4.6 | Numerical experiments — | 146 |
| 4.7 | Summary and extension — | 148 |

5 Difference methods for the Camassa–Holm equation — 151

| | | |
|-------|---|-----|
| 5.1 | Introduction — | 151 |
| 5.2 | Two-level nonlinear difference scheme — | 152 |
| 5.2.1 | Derivation of the difference scheme — | 152 |
| 5.2.2 | Conservation of the difference solution — | 153 |
| 5.2.3 | Existence and uniqueness of the difference solution — | 154 |
| 5.2.4 | Convergence of the difference solution — | 157 |
| 5.3 | Three-level linearized difference scheme — | 159 |
| 5.3.1 | Derivation of the difference scheme — | 159 |
| 5.3.2 | Conservation and boundedness of the difference solution — | 160 |
| 5.3.3 | Existence and uniqueness of the difference solution — | 161 |
| 5.3.4 | Convergence of the difference solution — | 162 |
| 5.4 | Numerical experiments — | 168 |
| 5.5 | Summary and extension — | 172 |

6 Difference methods for the Schrödinger equation — 174

| | | |
|-------|---|-----|
| 6.1 | Introduction — | 174 |
| 6.2 | Two-level nonlinear difference scheme — | 176 |
| 6.2.1 | Derivation of the difference scheme — | 176 |
| 6.2.2 | Conservation and boundedness of the difference solution — | 177 |
| 6.2.3 | Existence and uniqueness of the difference solution — | 180 |
| 6.2.4 | Convergence of the difference solution — | 182 |
| 6.3 | Three-level linearized difference scheme — | 188 |
| 6.3.1 | Derivation of the difference scheme — | 188 |
| 6.3.2 | Conservation and boundedness of the difference solution — | 189 |
| 6.3.3 | Existence and uniqueness of the difference solution — | 191 |
| 6.3.4 | Convergence of the difference solution — | 192 |
| 6.4 | Fourth-order three-level linearized difference scheme — | 200 |
| 6.4.1 | Several numerical differential formulas — | 200 |
| 6.4.2 | Derivation of the difference scheme — | 203 |
| 6.4.3 | Existence and uniqueness of the difference solution — | 205 |

| | | |
|-------|---|------------|
| 6.4.4 | Conservation and boundedness of the difference solution — | 207 |
| 6.4.5 | Convergence of the difference solution — | 211 |
| 6.5 | Numerical experiments — | 216 |
| 6.6 | Summary and extension — | 219 |

7 Difference methods for the Kuramoto–Tsuzuki equation — 220

| | | |
|-------|---|------------|
| 7.1 | Introduction — | 220 |
| 7.2 | Two-level nonlinear difference scheme — | 225 |
| 7.2.1 | Derivation of the difference scheme — | 225 |
| 7.2.2 | Existence of the difference solution — | 227 |
| 7.2.3 | Boundedness of the difference solution — | 228 |
| 7.2.4 | Uniqueness of the difference solution — | 233 |
| 7.2.5 | Convergence of the difference solution — | 234 |
| 7.3 | Three-level linearized difference scheme — | 237 |
| 7.3.1 | Derivation of the difference scheme — | 237 |
| 7.3.2 | Boundedness of the difference solution — | 239 |
| 7.3.3 | Existence and uniqueness of the difference solution — | 241 |
| 7.3.4 | Convergence of the difference solution — | 242 |
| 7.4 | Numerical experiments — | 246 |
| 7.5 | Summary and extension — | 247 |

8 Difference methods for the Zakharov equation — 249

| | | |
|-------|--|------------|
| 8.1 | Introduction — | 249 |
| 8.2 | Two-level nonlinear difference scheme — | 253 |
| 8.2.1 | Derivation of the difference scheme — | 253 |
| 8.2.2 | Existence of the difference solution — | 255 |
| 8.2.3 | Conservation and boundedness of the difference solution — | 257 |
| 8.2.4 | Convergence of the difference solution — | 259 |
| 8.3 | Three-level linearized locally decoupled difference scheme — | 267 |
| 8.3.1 | Derivation of the difference scheme — | 267 |
| 8.3.2 | Existence of the difference solution — | 269 |
| 8.3.3 | Conservation and boundedness of the difference solution — | 270 |
| 8.3.4 | Convergence of the difference solution — | 274 |
| 8.4 | Numerical experiments — | 282 |
| 8.5 | Summary and extension — | 283 |

9 Difference methods for the Ginzburg–Landau equation — 285

| | | |
|-------|--|------------|
| 9.1 | Introduction — | 285 |
| 9.2 | Two-level nonlinear difference scheme — | 286 |
| 9.2.1 | Derivation of the difference scheme — | 290 |
| 9.2.2 | Existence of the difference solution — | 291 |
| 9.2.3 | Boundedness of the difference solution — | 292 |

| | | |
|-----------|--|------------|
| 9.2.4 | Convergence of the difference solution — | 294 |
| 9.3 | Three-level linearized difference scheme — | 298 |
| 9.3.1 | Derivation of the difference scheme — | 298 |
| 9.3.2 | Existence of the difference solution — | 299 |
| 9.3.3 | Boundedness of the difference solution — | 300 |
| 9.3.4 | Convergence of the difference solution — | 302 |
| 9.4 | Numerical experiments — | 307 |
| 9.5 | Summary and extension — | 308 |
| 10 | Difference methods for the Cahn–Hilliard equation — | 309 |
| 10.1 | Introduction — | 309 |
| 10.2 | Two-level nonlinear difference scheme — | 312 |
| 10.2.1 | Derivation of the difference scheme — | 315 |
| 10.2.2 | Existence of the difference solution — | 317 |
| 10.2.3 | Boundedness of the difference solution — | 319 |
| 10.2.4 | Convergence of the difference solution — | 320 |
| 10.3 | Three-level linearized difference scheme — | 326 |
| 10.3.1 | Derivation of the difference scheme — | 326 |
| 10.3.2 | Existence and uniqueness of the difference solution — | 327 |
| 10.3.3 | Convergence of the difference solution — | 328 |
| 10.4 | Three-level linearized compact difference scheme — | 336 |
| 10.4.1 | Derivation of the difference scheme — | 338 |
| 10.4.2 | Existence and uniqueness of the difference solution — | 340 |
| 10.4.3 | Convergence of the difference solution — | 342 |
| 10.5 | Numerical experiments — | 348 |
| 10.6 | Summary and extension — | 349 |
| 11 | Difference methods for the epitaxial growth model — | 351 |
| 11.1 | Introduction — | 351 |
| 11.2 | Notation and basic lemmas — | 352 |
| 11.3 | Two-level nonlinear backward Euler difference scheme — | 356 |
| 11.3.1 | Derivation of the difference scheme — | 356 |
| 11.3.2 | Boundedness of the difference solution — | 357 |
| 11.3.3 | Existence and uniqueness of the difference solution — | 359 |
| 11.3.4 | Convergence of the difference solution — | 362 |
| 11.4 | Two-level linearized backward Euler difference scheme — | 365 |
| 11.4.1 | Derivation of the difference scheme — | 366 |
| 11.4.2 | Boundedness of the difference solution — | 367 |
| 11.4.3 | Existence of the difference solution — | 367 |
| 11.4.4 | Convergence of the difference solution — | 368 |
| 11.5 | Three-level linearized backward Euler difference scheme — | 371 |
| 11.5.1 | Derivation of the difference scheme — | 371 |

XIV — Contents

| | | |
|-----------|---|------------|
| 11.5.2 | Boundedness of the difference solution — | 373 |
| 11.5.3 | Existence of the difference solution — | 376 |
| 11.5.4 | Convergence of the difference solution — | 377 |
| 11.6 | Numerical experiments — | 382 |
| 11.7 | Summary and extension — | 385 |
| 12 | Difference methods for the phase field crystal model — | 387 |
| 12.1 | Introduction — | 387 |
| 12.2 | Notation and basic lemmas — | 388 |
| 12.3 | Two-level nonlinear difference scheme — | 390 |
| 12.3.1 | Derivation of the difference scheme — | 390 |
| 12.3.2 | Boundedness of the difference solution — | 391 |
| 12.3.3 | Existence and uniqueness of the difference solution — | 393 |
| 12.3.4 | Convergence of the difference solution — | 396 |
| 12.4 | Three-level linearized difference scheme — | 399 |
| 12.4.1 | Derivation of the difference scheme — | 399 |
| 12.4.2 | Energy stability of the difference solution — | 400 |
| 12.4.3 | Convergence of the difference solution — | 402 |
| 12.5 | Numerical experiments — | 406 |
| 12.6 | Summary and extension — | 407 |
