

Contents

1	Introduction.....	1
1.1	Definitions of Near-Field.....	1
1.1.1	Evanescent Wave Penetration Depth	2
1.1.2	Surface Plasmon Polariton (SPP) Penetration Depth.....	4
1.1.3	Photon Penetration Skin-Depth into Metal	7
1.1.4	Penetration Depth of No-Slip Boundary Conditions	7
1.1.5	Equilibrium Height (h_m) for Small Particles under Near-Field Forces.....	10
1.2	Synopsis.....	13
2	Total Internal Reflection Microscopy (TIRM).....	15
2.1	Principles and Configuration of TIRM	15
2.2	Ratiometric TIRM Imaging Analysis	18
2.3	Near-Field Applications of TIRM	20
2.3.1	Near-Wall Hindered Brownian Motion of Nanoparticles	20
2.3.2	Slip-Flows in the Near-Field.....	23
2.3.3	Cytoplasmic Viscosity and Intracellular Vesicle Sizes.....	26
3	Optical Serial Sectioning Microscopy (OSSM).....	29
3.1	Point Spread Functions (PSFs) under Aberration-Free Design Conditions.....	29
3.2	Point Spread Functions (PSFs) under Off-Design Conditions.....	31
3.3	Principles of OSSM	35
3.4	Near-Field Applications of OSSM.....	37
3.4.1	Three-Dimensional Particle Tracking Velocimetry (PTV).....	37
3.4.2	Near-Wall Thermometry.....	42
3.4.3	Near-Field Mixture Concentration Measurements.....	49
4	Confocal Laser Scanning Microscopy (CLSM).....	55
4.1	Principles of Confocal Imaging	55
4.2	Microscopic Imaging Resolutions	57
4.3	Confocal Microscopic Imaging Resolutions.....	59
4.4	Optical Slicing Thickness of Confocal Microscopy	63
4.5	Confocal Laser Scanning Microscopic Particle Imaging Velocimetry (CLSM-PIV) System	65

4.6	Near-Field Applications of CLSM-PIV	68
4.6.1	Poiseuille Flows in a Microtube	68
4.6.2	Microscale Rotating Couette Flows	73
4.6.3	Moving Bubbles in a Microchannel	76
5	Surface Plasmon Resonance Microscopy (SPRM).....	81
5.1	Surface Plasmon Polaritons (SPPs)	81
5.2	Dispersion of SPPs	83
5.3	Kretschmann's Three-Layer Configuration	85
5.4	Surface Plasmon Resonance (SPR) Reflectance	87
5.5	Surface Plasmon Resonance Microscopy (SPRM) Imaging Systems	92
5.6	Selection of a Prism for SPRM	95
5.7	SPR Reflectance Imaging Resolution	97
5.8	Near-Field Applications of SPRM	101
5.8.1	History and Uses of SPRM	101
5.8.2	Label-Free Mapping of Microfluidic Mixing Fields	102
5.8.3	Near-Field Mapping of Salinity Diffusion	104
5.8.4	Dynamic Monitoring of Nanoparticle Concentration Profiles	107
5.8.5	Unveiling the Fingerprints of Nanocrystalline Self-assembly	110
5.8.6	Near-Wall Thermometry	113
6	Reflection Interference Contrast Microscopy (RICM).....	119
6.1	Interference of Plane Waves	119
6.2	Principles and Practical Issues of RICM	121
6.3	Near-Field Applications of RICM	123
6.3.1	Thin-Film Thickness Measurements	123
6.3.2	Electrohydrodynamic (EHD) Control of Thin Liquid Film	123
6.3.3	Dynamic Fingerprinting of Live-Cell Focal Contacts	127
