

C O N T E N T S

A. Acker and W. Walter:

The quenching problem for nonlinear parabolic differential equations 1

J. M. Ball:

On the calculus of variations and sequentially weakly continuous maps ... 3

M. F. Barnsley and P. D. Robinson:

Bivariational bounds on $\langle g, \phi \rangle$ for non-linear problems $F\phi = 0$ 26

H. E. Benzinger:

The spectral analysis of a Stone regular differential operator 34

L. Collatz:

Bifurcation diagrams 41

D. Colton:

Walsh's theorem for the heat equation 54

C. Conley:

A new statement of Wazewski's theorem and an example 61

M. S. P. Eastham:

On the absence of square-integrable solutions of the Sturm-Liouville equation 72

W. D. Evans:

On limit-point and Dirichlet-type results for second-order differential expressions 78

W. N. Everitt:

Spectral theory of the Wirtinger inequality 93

W. E. Fitzgibbon:

Nonlinear evolution operators and delay equations 106

J. A. Gatica and P. Waltman:

A singular functional differential equation arising in an immunological model	114
---	-----

H. Grabmüller:

On linear partial integro differential equations with a small parameter ..	125
--	-----

P. Grisvard:

Smoothness of the solution of a monotonic boundary value problem for a second order elliptic equation in a general convex domain	135
--	-----

P. Habets:

On the method of strained coordinates	152
---	-----

K. P. Hadeler:

Nonlinear diffusion equations in Biology	163
--	-----

J. K. Hale:

Discrete dissipative processes	207
--------------------------------------	-----

W. S. Hall:

Integrating a differential equation with a weak* continuous vector field ..	225
---	-----

W. A. Harris Jr.:

On asymptotic integration	231
---------------------------------	-----

G. Hecquet:

Existence globale des solutions de quelques problemes aux limites	239
---	-----

G. C. Hsiao and R. Weinacht:

Singular perturbation problems for a class of singular partial differential equations	249
---	-----

R. M. Kauffman:

On the limit-n classification of ordinary differential operators with positive coefficients	259
---	-----

M. Kisielewicz:

On the non-convergence of successive approximations in the theory of ordinary differential equations	267
--	-----

R. J. Knops:

Comments on nonlinear elasticity and stability	271
--	-----

E. L. Koh:

A Mikusinski Calculus for the Bessel operator B_{μ}	291
---	-----

K. Kreith:

An oscillation theory for fourth order differential equations	301
---	-----

T. Küpper:

Pointwise error bounds for the eigenfunctions of one-dimensional Schrödinger operators	309
---	-----

L. Lara-Carrero:

Stability of shock waves	316
--------------------------------	-----

N. G. Lloyd:

Remarks on L_2 solutions	329
----------------------------------	-----

V. Marić and M. Tomić:

Regularly varying functions and differential equations	333
--	-----

J. W. Neuberger:

Projection methods for linear and nonlinear systems of partial differential equations	361
--	-----

K. Nickel:

New results on strongly coupled systems of parabolic differential equations	350
--	-----

L. A. Peletier:

On a nonlinear diffusion equation arising in population genetics	365
--	-----

A. T. Plant:

A generalization of the Flaschka-Leitman theorem	372
--	-----

A. J. B. Potter:

Hilbert's projective metric applied to a class of positive operators	377
--	-----

T. T. Read:

A limit-point criterion for $-(py')' + qy$	383
--	-----

E. E. Rosinger:

Nonsymmetric Dirac distributions in scattering theory	391
---	-----

P. W. Schaefer and R. P. Sperb:

A maximum principle for a class of functionals in non-linear Dirichlet problems	400
--	-----

G. Scheu:

Global methods for the construction of convergent sequences of bounds for systems of ordinary initial value problems	407
---	-----

M. Shearer:

Bifurcation from a multiple eigenvalue	417
--	-----

C. G. Simader:

Another approach to the Dirichlet problem for very strongly nonlinear elliptic equations	425
---	-----

B. D. Sleeman:

Global estimates for non-linear wave equations and linear wave equations with non-linear boundary constraints	438
--	-----

E. Stephan:

Difference approximations for some pseudodifferential equations in R^n	452
--	-----

E. Stephan and W. Wendland:

Remarks to Galerkin and least squares methods with finite elements for general elliptic problems	461
---	-----

C. A. Stuart:

Boundary-value problems with discontinuous non-linearities	472
--	-----

A. van Harten:

On an elliptic singular perturbation problem	485
--	-----

P. Volkmann:

Über die Existenz von Lösungen der Differentialgleichung $u' = f(u)$ in einer abgeschlossenen Menge, wenn f eine k -Mengenkontraktion ist	496
--	-----

<u>J. Walter:</u> Bemerkungen zur Verwendung der Pfaffschen Formen bei der Definition der absoluten Temperatur nach Carathéodory	504
---	-----

H. O. Walther:

On the eigenvalues of linear autonomous differential delay equations	513
--	-----

N. Weck:

An explicit St. Venant's principle in three-dimensional elasticity	518
--	-----

J. Weidmann:

Trace class methods for scattering in a homogeneous electro-static
field 527

A. D. Wood and F. D. Zaman:

Eigenvalue problems for free vibrations of rectangular elastic plates
with random inhomogeneities 533

A. Zettl:

Limit point conditions for powers 540

W.D.Evans and A.Zettl

Addendum to "Limit Point Conditions for Powers" 550
