

CONTENTS

Lindsay N. Childs	
On Brauer groups of some normal local rings.....	1
F. R. DeMeyer	
The Brauer group of affine curves.....	16
M.-A. Knus, M. Ojanguren, D. J. Saltman	
On Brauer groups in characteristic p	25
Gerald S. Garfinkel	
A module approach to the Chase-Rosenberg-Zelinsky sequences	50
Daniel Zelinsky	
Long exact sequences and the Brauer group.....	63
Andy R. Magid	
The Picard sequence of a fibration.....	71
George Szeto	
The Pierce representation of Azumaya algebras.....	86
William Gustafson	
A remark on class groups.....	92
Philip LaFollette	
Splitting of Azumaya algebras over number rings.....	100
H. F. Kreimer, Jr.	
Abelian p -extensions and cohomology.....	104
Bodo Pareigis	
Non-additive ring and module theory IV. The Brauer group of a symmetric monoidal category.....	112
Morris Orzech	
Brauer groups of graded algebras.....	134
Stephen U. Chase	
On a variant of the Witt and Brauer group.....	148
