

Table of Contents

Preface	viii
W. Greenberg	Analytical and Semi-analytical Methods in Transport Theory 1
SYMPOSIUM LECTURES	
C. Cercignani	Case's Method and Linearized Kinetic Theory 7
I. Gohberg M. Kaashoek	The Wiener-Hopf Method for the Transport Equation: A Finite Dimensional Version 20
E. Larsen	Transport Acceleration Methods as Two-Level Multigrid Algorithms 34
M. Z. Yang	Transport Theory: The View from China 48
CONFERENCE LECTURES	
R. Aronson R. Barbour J. Lubowsky H. Graber	Application of Transport Theory to Infra-Red Medical Imaging 64
V. Boffi A. Rossani	Stationary Non-Maxwellian Problems in Extended Kinetic Theory 76
N. Corngold M. Williams	What Do Neutron Transport and "JELL-O" Have in Common? 89
J. Crawford	Amplitude Equations on Unstable Manifolds: Singular Behavior from Neutral Modes 97
L. Demeio	A Numerical Study about the Existence of BGK Modes near a Maxwellian Equilibrium 109
H. Frisch	A Cauchy Integral Equation Method for Half-Space Convolution Equations 121
G. Frosali L. Arlotti	Long time behaviour of Particle Swarms in Runaway Regime 131

B. Ganapol	Radiative Transfer in a Dense Plant Canopy without Azimuthal Symmetry	144
J. Holloway J. Dorning	Nonlinear but Small Amplitude Longitudinal Plasma Waves	155
L. Kuščer	Models of Energy Exchange in Polyatomic Gases	180
A. Latyshev M. Gajdukov I. Spitkovski	Analytic Solution of a Model Boltzmann Equation with Collision Operator of Compound Type	189
F. Malgavi C. Levermore G. Pomraning	Asymptotic Limits of a Statistical Transport Description	200
N. McCormick	Inverse Radiative Transfer Algorithms for Estimating a Particle Size Distribution	208
R. Monaco M. Lachowicz	Analysis by the Operator Interpolation Method of an Initial-Boundary Value Problem for the Semidiscrete Boltzmann Equation	215
S. Pavveri-Fontana	Particle Transport in Moving Medium: Kinetic Theory vs. Diffusion Theory	227
R. Pettersson	The Linear Boltzmann Equation with General Boundary Conditions and Infinite Range Forces	238
J. Polewczak	A Unified Approach to Initial Value Problems for the Generalized Enskog Equation	251
G. Pomraning	Diffusion Theory via Asymptotics	261
F. Premuda A. Portone	Projectional Solution of a Single F-Transformed Integral Equation for Arbitrarily Anisotropic Neutron Transport in Critical Slab	270
V. Protopopescu	An Example of a Reaction-Diffusion System with Nonlinear Competitive Interactions	284
G. Spiga	Extended Kinetic Equations for Gas Mixtures	294

R. Szilard	A Modified Linear Discontinuous Spatial Discretization	
G. Pomraning	Method in Planar Geometry	304
P. Nelson	Criticality and Critical Size for Transport Systems	311
F. Yu		
Forty Years of Transport Theory: Kenneth Case and Paul Zweifel		324
Author Index		327

For jointly authored contributions, the presenting author is listed first. The Holloway/Doming contribution was presented in two lectures, one by each author.
