

Contents

Part I Experimental

1	Basic Properties of 3d-Pnictides	3
1.1	Main Compounds of 3d-Pnictide	3
1.2	Crystal Growth by Sintering Method	3
1.3	Crystal Structure of NiAs-, MnP-, and Cu ₂ Sb-Type Structure	5
1.3.1	NiAs-Type Structure	5
1.3.2	MnP-Type Structure	5
1.3.3	Cu ₂ Sb-Type Structure	8
1.4	Nonstoichiometric Compounds	9
	References	10
2	Overview of Magnetic Properties of NiAs-Type (MnP-Type) and Cu₂Sb-Type Compounds	11
2.1	Compounds That Have Magnetic Ordering Phase	11
2.2	Compounds without Magnetic Ordering	13
	References	15
3	Properties of the Compounds with NiAs-Type (MnP-Type) and Cu₂Sb-Type Structures	17
3.1	MnP and Related Compounds	17
3.2	MnAs and Related Compounds	17
3.2.1	Magnetic Transition of MnAs and the Bean–Rodbell Theory	17
3.2.2	Various Type of Phase Transition of MnAs _{1-x} P _x	26
3.2.3	Anomalous Behavior of MnAs _{1-x} Sb _x	32
3.2.4	Effect of High Pressure on MnAs _{1-x} Sb _x	37
3.2.5	Mn _{1-x} Cr _x As, Mn _{1-x} Ti _x As, etc.	39
3.2.6	Magnetic Refrigeration Using MnAs and the Related Compounds	40
3.3	MnSb and MnBi	45

3.4	CrAs and Related Compounds	46
3.4.1	Anomalous Magnetic Transition of CrAs	46
3.4.2	Critical Lattice Constant of $\text{CrAs}_{1-x}\text{P}_x$ and $\text{Cr}_{1-x}\text{M}_x\text{As}$ ($\text{M} = \text{Mn, Ni, etc.}$)	48
3.4.3	Phenomenological Theory for the First Order Transition of CrAs	52
3.4.4	$\text{CrAs}_{1-x}\text{Sb}_x$	53
3.5	CrSb	55
3.6	CrP	56
3.7	Properties of Cu_2Sb -Type Compounds	56
3.7.1	Antiferromagnetic–Ferrimagnetic Transition of $\text{Mn}_{2-x}\text{Cr}_x\text{Sb}$ and Kittel’s Model	56
3.7.2	Magnetic Transition of $\text{Fe}_{a-x}\text{Mn}_x\text{As}$ ($a \simeq 2$)	63
3.7.3	Layered Ferromagnets MnAlGe and MnGaGe	63
3.7.4	Application of the First Order Transition of $\text{Mn}_{2-x}\text{Cr}_x\text{Sb}$	64
	References	66
Appendix	Magnetic Transition and Free Energy	69

Part II Itinerant Electron Theory

4	Electronic Band Structure and Magnetism of NiAs-Type Compounds	75
4.1	Band Calculation	75
4.2	Band Structures and Optical Properties	76
4.2.1	Pnictides: MnAs and MnSb	76
4.2.2	FeAs , CoAs , and NiAs	83
4.2.3	CrSb , CrAs , and CrP	85
4.2.4	Chalcogenides: CrTe , CrSe , and CrS	88
4.2.5	Optical Properties	91
4.3	Spin Fluctuations and Anomalous Magnetic and Elastic Properties	93
4.3.1	Paramagnetic Susceptibility and Anomalous Thermal Effect of MnAs and $\text{MnAs}_{1-x}\text{P}_x$	93
4.3.2	Spin Fluctuation and Magnetism	95
4.3.3	Spin Fluctuation and Elastic Properties	100
4.3.4	Paramagnetic Susceptibility of CoAs and FeAs	102
4.4	Fermi Surface of NiAs and the de Haas–van Alfen Effect	103
4.5	Pressure Effect on Magnetic State of CrTe , CrSe , and CrS	107
4.6	Magnetic Ordering and Instability of Paramagnetic State	112
4.6.1	Double-Helical Magnetic Ordering of MnP -Type Compounds	112
4.6.2	Instability of Paramagnetic State	114
4.6.3	Energy of Double-Helical Spin Density Wave State	117

4.7	Phase Transition from the NiAs-Type to the MnP-Type Structure . . .	119
4.7.1	Electron–Lattice Interaction Coefficient	120
4.7.2	Tendency of Structural Transformation from the NiAs-Type to the MnP-Type	121
	References	125
5	Itinerant Electron Theory of Magnetism of Cu₂Sb-Type Compounds	127
5.1	Crystal Structure and Magnetic Properties	127
5.2	Band Structures of Cu ₂ Sb-Type Compounds and Magnetic and Optical Properties	127
5.2.1	Nonmagnetic State of Cr ₂ As, Mn ₂ As, Fe ₂ As, Mn ₂ Sb, CrMnAs, and FeMnAs	129
5.2.2	Ferrimagnetic Band of Mn ₂ Sb	132
5.2.3	Ferromagnetic State of MnAlGe and MnGaGe	133
5.2.4	Antiferromagnetic Bands of Cr ₂ As, Mn ₂ As, and Fe ₂ As	134
5.2.5	Magnetic Ordering of Cu ₂ Sb-Type Compounds	136
5.2.6	Photoemission and Inverse Photoemission	137
	References	138
	Index	139
