

Contents

Chapter 1

Set theory	1
1.1 Sets	1
1.2 Operations with Sets	5
1.3 A set theory drill and practice program (optional)	13
1.4 Boolean algebra	15
1.5 The number of elements in a set	20

Chapter 2

Logic	25
2.1 Statements and logical operations	25
2.2 Conditional statements	32
2.3 Logical equivalence	37
2.4 Arguments	41

Chapter 3

Vectors and matrices	45
3.1 Vectors	45
3.2 Operations with vectors	49
3.3 Matrices	53
3.4 Operations with matrices	59
3.5 Properties of matrices	66

Chapter 4

Systems of linear equations	71
4.1 Linear equations	71
4.2 Two-by-two systems of linear equations	73

Contents

4.3	Elementary row operations	78
4.4	Larger systems of linear equations	80
4.5	Row reduced form	85
4.6	The inverse of a matrix	91
4.7	Inverses in APL	98
4.8	Applications	100

Chapter 5

Determinants 103

5.1	Definition of a determinant	103
5.2	A Program for evaluation of determinants	107
5.3	Cofactors	110
5.4	Adjoint and inverses	115
5.5	Cramer's rule	120

Chapter 6

Functions and graphing 125

6.1	Definition of a function	125
6.2	Graphing	133
6.3	Linear functions	142
6.4	Quadratic functions	152
6.5	Polynomials	161
6.6	Rational functions	170

Chapter 7

Exponential and logarithmic functions 177

7.1	Exponential functions	177
7.2	Applications of exponential functions	183
7.3	Logarithmic functions	188
7.4	Properties and applications of logarithms	193

Chapter 8

Differential calculus 199

8.1	The limit of a function	199
8.2	Slope of a curve and the definition of derivative at a point	206
8.3	Differentiating polynomials	211
8.4	Applications of derivatives	217
8.5	More rules of differentiation (optional)	223
8.6	Theory of maxima, minima	227
8.7	Applied maxima, minima	233
8.8	Curve sketching using derivatives	237

Chapter 9

Integral calculus **242**

- 9.1 Antidifferentiation 242
- 9.2 Some formulas for antidifferentiation 246
- 9.3 Area under a curve 252
- 9.4 The definite integral 257
- 9.5 The fundamental theorem of calculus 263
- 9.6 More applications of integration 267

Chapter 10

Probability **272**

- 10.1 Axioms of probability 272
- 10.2 More rules of probability 277
- 10.3 Permutations and combinations 283
- 10.4 The hypergeometric distribution 289
- 10.5 The binomial distribution 294
- 10.6 The Poisson distribution 298

Chapter 11

Statistics **303**

- 11.1 Random samples and frequency distributions 303
- 11.2 Measures of central tendency 311
- 11.3 Measures of dispersion 314
- 11.4 The normal distribution 318
- 11.5 The sampling distribution of the mean 326

Chapter 12

The trigonometric functions **330**

- 12.1 Angles 330
- 12.2 The trigonometric functions 335
- 12.3 The trigonometric functions in APL 344
- 12.4 Graphs of the trigonometric functions 346
- 12.5 The inverse trigonometric functions 351
- 12.6 Solving right triangles 354
- 12.7 Solving oblique triangles 358

Appendix **363**

- A.0 Using APL on a computer terminal 363
- A.1 Introduction to APL 365
- A.2 Program definition 371
- A.3 Branching 374
- A.4 Program revision and editing procedures 378
- A.5 The trace command 382
