<b>PREFACE</b>	<b>vii</b>
----------------	------------

<b>ACKNOWLEDGMENTS</b>	<b>xi</b>
------------------------	-----------

<b>1</b>	<b>THE CONCEPT OF DISEASE AND ITS HISTORY</b>	<b>1</b>
	Introduction	1
	Prehistoric Times	2
	Egypt, Greece, and Rome	3
	Medieval Times	5
	The Foundation of Modern Pathology	5
	The Renaissance	5
	The Great Schools of Medicine in the 18th and 19th Centuries	7
	Cellular Pathology	12
	The Origins of Chemical Pathology	17
	Alchemy	18
	Renaissance Chemistry and Medicine	19
	Discovery of Oxygen and Respiration	23
	The 19th Century	28
<b>2</b>	<b>DEVELOPMENT OF EXISTING KNOWLEDGE</b>	<b>33</b>
	Introduction	33
	Gene Expression	33
	Cell Structure	40
	Molecular Organization	40
	Nucleus	42
	Cytoplasm	43
	Endoplasmic Reticulum	43
	The Cytosol and Glycolysis	49
	Mitochondria and Aerobic Pathways	50
	Other Cytoplasmic Organelles	51
	Cell Membrane	51
	Intercellular Integration	53
	Microscopic Features	53
	Nervous System	54

	Chemical Messengers	55
	Circulatory System	56
	Conclusion	57
<b>3</b>	<b>DEFENSE MECHANISMS</b>	<b>59</b>
	Introduction	59
	First Line of Defense	60
	Blood Coagulation, Inflammation, and Immunity	61
	Blood Coagulation	64
	Inflammation	66
	Immunity	69
	Restoration of Lost Tissues	72
	Wound Healing	73
	Fractures	75
	Hypertrophy and Hyperplasia	77
<b>4</b>	<b>CAUSES OF DISEASE</b>	<b>80</b>
	Introduction	80
	Hereditary Diseases	81
	Congenital Anomalies	82
	Conflict with the Environment	84
	Trauma	84
	Toxins	85
	Biological Agents	86
	Nutritional Deficiencies	118
	Hormonal Imbalances	120
	Body Fluids and Electrolyte Imbalances	121
	Remarks on Origin of Life	121
	Water and Sodium Balance	124
	Defective Defense Mechanisms	125
	Excessive Response to Injury	127
	Conclusion	130
<b>5</b>	<b>INJURIES TO UNITS OF SPECIFICITY</b>	<b>131</b>
	Introduction	131
	Primary Injury to DNA	132
	DNA Repair	133
	Consequences of Injuries to DNA	137
	Inherited Mutations	138
	Somatic Mutations	139
	Interference with DNA Synthesis	145
	Enzymic Block	146
	Substrate Depletion	146
	Antimetabolites	146

---

	Injuries to Transcription	155
	Pathology of Translation	158
	Conclusion	161
<b>6</b>	<b>INJURIES TO CATALYTIC UNITS</b>	<b>167</b>
	About Atoms and Molecules	167
	About Chemical Reactions	173
	About Enzyme Reactions	175
	Life Cycle of Enzymes	180
	Pathology of the Catalytic Unit	182
	Absence of Enzyme Molecules	183
	Defective Enzymes	183
	Increased Enzyme Activity	184
	Defective Enzyme Regulation	184
	Defects in Coenzymes	184
	Metal Deficiency	188
	Enzyme Inhibition	189
	Disease and Substrate Alteration	190
	Substrate Deficiency	190
	Substrate Excess	194
	Conclusion	194
<b>7</b>	<b>HORMONE IMBALANCE</b>	<b>195</b>
	Endocrine Glands	195
	Mode of Action of Hormones	196
	Regulation of Hormone Secretion	198
	Second Messengers	200
	Hormone Degradation	201
	Hormonal Diseases	201
	Absence of Endocrine Organs	201
	Nutritional Deficiencies and Goiters	204
	Defects in Hormone Synthesis	204
	Defects in Hormone Transport	204
	Receptor Defects	205
	Regulatory Defects	205
	Glandular Hyperplasia	206
<b>8</b>	<b>PATHOLOGY OF CELL MEMBRANES</b>	<b>207</b>
	Introduction	207
	Function of the Plasma Membrane	208
	Transport	208
	Movement	211
	Adhesion	212
	Cell Communications	214

	Regulation of Cellular Metabolism	216
	Structure of Cell Membranes	218
	Molecular Organization of the Cell Membrane	219
	Biosynthesis of the Cell Membrane	224
	The Cytocavitory Network	226
	Endoplasmic Reticulum	227
	Lysosomes	227
	Peroxisomes	228
	Mitochondria	229
	Pathology of Cell Membranes	234
	Structural Injuries	235
	Functional Injuries	239
	Conclusion	250
<b>9</b>	<b>REFLECTIONS ON CELLULAR DEATH</b>	<b>251</b>
	Introduction	251
	Primary, Secondary, and Critical Injuries	252
	Programmed Death	253
	Provoked Death	255
	Molecular Mechanisms in Provoked Death	256
	The Point of No Return	256
	Catabolic Enzymes and Cellular Death	257
	Correlation of Some Morphological and Bio-chemical Events in Cellular Death	259
	Conclusion	262
<b>10</b>	<b>THE GREAT KILLERS, ATHEROSCLEROSIS AND CANCER</b>	<b>263</b>
	Introduction	263
	Atherosclerosis	264
	Pathogenesis	264
	Coronary Heart Disease	265
	Cerebral Consequences of Atherosclerosis	268
	Concluding Remarks on Atherosclerosis	272
	Cancer	273
	Clinical Pathology of Cancer	273
	Pathogenesis of Cancer	275
	Chemical Transformation in Vitro	276
	Carcinogens in Humans	277
	Cancers and Viruses in Humans	283
<b>11</b>	<b>AGING</b>	<b>288</b>
	Introduction	288
	Manifestations of Aging	290
	Possible Cellular Mechanisms in Aging	290

---

Biological Causes of Aging	293
Programmed Aging	294
Somatic Mutations and Aging	294
Immunologic Theory of Aging	296
Conclusion	296
 Bibliography	 297
 Index	 301
