

TABLE OF CONTENTS

Preface	V
§ 1 Group schemes over a field	1
§ 2 Group subschemes of a group scheme	15
§ 3 Coalgebras over a field	29
§ 4 Hopf algebras over a field	45
§ 5 Structures of colocal bigebras	57
§ 6 Formal groups over a field	68
§ 7 Structures of formal groups as local rings	82
§ 8 Algebraic Hopf subalgebras	97
§ 9 Rational representations of group schemes	113
§ 10 Joins and intersections of group subschemes	126
§ 11 Adjoint representations of group schemes	142
§ 12 Normalizers of Hopf subalgebras and group subschemes	154
§ 13 Centralizers of Hopf subalgebras and group subschemes	166
§ 14 Commutators of Hopf subalgebras and group subschemes	175
§ 15 Lie algebras attached to group schemes	191
§ 16 Left invariant semi-derivations of group varieties	203
§ 17 Algebraic schemes on which a group scheme operates	216
§ 18 Isogenies of group varieties	231
§ 19 Kernels of purely inseparable isogenies	243
Appendix I	258
Appendix II	279
Appendix III	294
