

Table of Contents

<i>Chapter 0. Introduction</i>	1
A. Motivation and History	1
B. Organization and Contents	4
C. What is New in this Book?	10
D. What are the Main Problems Today?	11
 <i>Chapter 1. Basic Facts about the Geodesic Flow</i>	 13
A. Summary	13
B. Generalities on Vector Bundles	14
C. The Cotangent Bundle	17
D. The Double Tangent Bundle	18
E. Riemannian Metrics	21
F. Calculus of Variations	22
G. The Geodesic Flow	28
H. Connectors	32
I. Covariant Derivatives	37
J. Jacobi Fields	42
K. Riemannian Geometry of the Tangent Bundle	46
L. Formulas for the First and Second Variations of the Length of Curves	48
M. Canonical Measures of Riemannian Manifolds	51
 <i>Chapter 2. The Manifold of Geodesics</i>	 53
A. Summary	53
B. The Manifold of Geodesics	53
C. The Manifold of Geodesics as a Symplectic Manifold	58
D. The Manifold of Geodesics as a Riemannian Manifold	61
 <i>Chapter 3. Compact Symmetric Spaces of Rank one From a Geometric Point of View</i>	 71
A. Introduction	71
B. The Projective Spaces as Base Spaces of the Hopf Fibrations	72
C. The Projective Spaces as Symmetric Spaces	75

D. The Hereditary Properties of Projective Spaces	78
E. The Geodesics of Projective Spaces	81
F. The Topology of Projective Spaces	83
G. The Cayley Projective Plane	86
 <i>Chapter 4. Some Examples of C- and P-Manifolds: Zoll and Tannery Surfaces</i>	 94
A. Introduction	94
B. Characterization of P -Metrics of Revolution on S^2	95
C. Tannery Surfaces and Zoll Surfaces Isometrically Embedded in $(\mathbb{R}^3, \text{can})$	105
D. Geodesics on Zoll Surfaces of Revolution	114
E. Higher Dimensional Analogues of Zoll metrics on S^2	119
F. On Conformal Deformations of P -Manifolds: A. Weinstein's Result	121
G. The Radon Transform on (S^2, can)	123
H. V. Guillemin's Proof of Funk's Claim	126
 <i>Chapter 5. Blaschke Manifolds and Blaschke's Conjecture</i>	 129
A. Summary	129
B. Metric Properties of a Riemannian Manifold	130
C. The Allamigeon-Warner Theorem	132
D. Pointed Blaschke Manifolds and Blaschke Manifolds	135
E. Some Properties of Blaschke Manifolds	141
F. Blaschke's Conjecture	143
G. The Kähler Case	149
H. An Infinitesimal Blaschke Conjecture	151
 <i>Chapter 6. Harmonic Manifolds</i>	 154
A. Introduction	154
B. Various Definitions, Equivalences	156
C. Infinitesimally Harmonic Manifolds, Curvature Conditions	160
D. Implications of Curvature Conditions	163
E. Harmonic Manifolds of Dimension 4	166
F. Globally Harmonic Manifolds: Allamigeon's Theorem	170
G. Strongly Harmonic Manifolds	172
 <i>Chapter 7. On the Topology of SC- and P-Manifolds</i>	 179
A. Introduction	179
B. Definitions	180
C. Examples and Counter-Examples	184
D. Bott-Samelson Theorem (C-Manifolds)	186
E. P -Manifolds	192
F. Homogeneous SC-Manifolds	194

G. Questions	198
H. Historical Note	200
<i>Chapter 8. The Spectrum of P-Manifolds</i>	<i>201</i>
A. Summary	201
B. Introduction	201
C. Wave Front Sets and Sobolev Spaces	203
D. Harmonic Analysis on Riemannian Manifolds	206
E. Propagation of Singularities	208
F. Proof of the Theorem 8.9 (J. Duistermaat and V. Guillemin)	209
G. A. Weinstein's result	210
H. On the First Eigenvalue $\lambda_1 = \mu_1^2$	211
<i>Appendix A. Foliations by Geodesic Circles. By D. B. A. Epstein</i>	<i>214</i>
I. A. W. Wadsley's Theorem	214
II. Foliations With All Leaves Compact	221
<i>Appendix B. Sturm-Liouville Equations all of whose Solutions are Periodic after F. Neuman. By Jean Pierre Bourguignon</i>	<i>225</i>
I. Summary	225
II. Periodic Geodesics and the Sturm-Liouville Equation	225
III. Sturm-Liouville Equations all of whose Solutions are Periodic	227
IV. Back to Geometry with Some Examples and Remarks	230
<i>Appendix C. Examples of Pointed Blaschke Manifolds. By Lionel Bérard Bergery.</i>	<i>231</i>
I. Introduction	231
II. A. Weinstein's Construction	231
III. Some Applications	234
<i>Appendix D. Blaschke's Conjecture for Spheres. By Marcel Berger</i>	<i>236</i>
I. Results	236
II. Some Lemmas	237
III. Proof of Theorem D.4	241
<i>Appendix E. An Inequality Arising in Geometry. By Jerry L. Kazdan</i>	<i>243</i>
<i>Bibliography</i>	<i>247</i>
<i>Notation Index.</i>	<i>255</i>
<i>Subject Index</i>	<i>259</i>
