

TABLE OF CONTENTS

INSTRUCTIONAL LECTURES

R.G. Stanton and J.G. Kalbfleisch: Introduction to Ramsey theory	1
---	---

INVITED ADDRESSES

R. Fuji-Hara and S.A. Vanstone: On automorphisms of doubly resolvable designs	29
R.G. Stanton and J.A. Bate: A computer search for B-coverings	37
R.G. Stanton and R.C. Mullin: Some new results on the covering numbers $N(t,k,v)$	51

CONTRIBUTED PAPERS

David Billington: Degree sequences uniquely realisable by hypergraphs	59
T.M. Caelli: On generating spatial configurations with identical interpoint distance distributions	69
D. de Caen and D.A. Gregory: Prime Boolean matrices	76
Peter Eades: Circulant (v,k,μ) designs	83
R.B. Eggleton and D.A. Holton: Pseudographic realizations of an infinitary degree sequence	94

L.R. Foulds and R.W. Robinson:	
Determining the asymptotic number of phylogenetic trees	110
C.D. Godsil and B.D. McKay:	
Graphs with regular neighbourhoods	127
Leslie M. Goldschlager:	
An approximation algorithm for computing the permanent	141
Phil Hanlon:	
The incidence algebra of a group reduced partially ordered set ..	148
Alan Hartman:	
Doubly and orthogonally resolvable quadruple systems	157
M.D. Hendy:	
Establishing the minimality of phylogenetic trees from protein sequences	165
Kevin McAvaney:	
A conjecture on two-point deleted subgraphs of Cartesian products	172
Elizabeth J. Morgan:	
Balanced ternary designs with block size three	186
A. Odlysko and B. Richmond:	
On the compositions of an integer	199
Cheryl E. Praeger:	
Symmetric graphs and a characterization of the Odd graphs	211
J. Seberry:	
Higher dimensional orthogonal designs and Hadamard matrices	220
Anne Penfold Street:	
Some designs with block size three	224
Deborah J. Street and Christopher A. Rodger:	
Some results on Bhaskar-Rao designs	238
Marta Sved:	
Tales from the "County Club"	246
