Contents

1	Fundamentals of SAP System Administration	23
1.1	Tasks of a System Administrator	23
1.2	Guiding Principles for System Administrators	25
1.3	Definitions	32
1.4	Summary	34
2	SAP System Administration	35
2.1	Starting and Stopping the SAP System	35
2.1.1	Starting the SAP System	36
2.1.2	Stopping the SAP System	41
2.2	Instances and Operation Modes	46
2.3	Maintaining Profile Parameters	62
2.4	Specific Monitoring Transactions	70
2.4.1	System Log	70
2.4.2	ABAP Dump Analysis	73
2.4.3	Checking the Application Servers and Work Processes ...	77
2.4.4	Lock Entries	80
2.4.5	Canceled Update Requests	83
2.5	System Messages	87
2.6	Connections	89
2.6.1	RFC Destinations	90
2.6.2	SAP Gateway Monitor	97
2.6.3	SAPconnect	99
2.6.4	Message Server Monitor	103
2.6.5	Internet Communication Framework	104
2.6.6	ICM Monitor	108
2.7	Client Administration	109
2.7.1	Creating Clients	110
2.7.2	Copying Clients	114
2.7.3	Deleting Clients	129
2.7.4	Checking the Client Copy Log	132
2.8	System Copy	133

2.8.1	Database Copy of the Production System	134
2.8.2	Client Copy with Data	135
2.8.3	Client Copy without Data	135
2.9	Summary	136

3 System Monitoring

37

3.1	The CCMS Alert Monitor	137
3.2	System Monitoring with the Standard CCMS Alert Monitor	138
3.3	Adapting the CCMS Monitor Sets	148
3.3.1	Hiding Monitor Sets	148
3.3.2	Defining a New Monitor Set	153
3.3.3	Adding a Monitor to a Monitor Set	156
3.3.4	Deleting a Monitor from a Monitor Set	159
3.3.5	Changing Alert Threshold Values	163
3.4	Auto-Reaction Methods	167
3.4.1	Changing an Auto-Reaction Method	168
3.4.2	Assigning an Auto-Reaction Method to a Monitor Object	173
3.5	Summary	178

4 System Administration with SAP Solution Manager

179

4.1	Functional Spectrum of SAP Solution Manager	179
4.2	Maintaining the System Landscape	181
4.2.1	Creating a Server	182
4.2.2	Creating a Database	184
4.2.3	Creating a System	186
4.3	Solutions	201
4.3.1	Creating a Solution	202
4.3.2	Activating and Deactivating Solutions	206
4.3.3	Self-Diagnosis	208
4.4	System Administration	211
4.4.1	Central System Administration	211
4.4.2	Central System Monitoring	227
4.4.3	SAP EarlyWatch Alert	240
4.5	Maintenance Optimizer	256
4.6	Summary	268

5 Scheduled Tasks**269**

5.1	Critical Tasks	270
5.1.1	Check Whether the SAP System Is Running	270
5.1.2	Checks to Determine Whether Your Backups Have Been Successful	270
5.2	Daily Tasks	274
5.2.1	Critical Tasks	274
5.2.2	SAP System	275
5.2.3	Database	277
5.2.4	Operating System	277
5.2.5	Other	278
5.3	Weekly Tasks	278
5.3.1	SAP System	278
5.3.2	Database	279
5.3.3	Operating System	279
5.3.4	Other	280
5.3.5	Overview of Transactions	280
5.4	Monthly Tasks	281
5.4.1	SAP System, Database, Operating System, Other	281
5.4.2	Checking Consumable Items	283
5.5	Quarterly Tasks	284
5.5.1	SAP System	284
5.5.2	Database	285
5.5.3	Operating System	286
5.5.4	Other	286
5.6	Annual Tasks	287
5.6.1	SAP System	287
5.6.2	Database	288
5.6.3	Operating System	289
5.6.4	Other	289
5.6.5	Overview of Transactions	289
5.7	Summary	292

6 Backup and Restore**293**

6.1	Backup	293
6.1.1	What Has to Be Saved?	294
6.1.2	Backup Types	298

6.1.3	Backup Strategy	304
6.1.4	Strategy Recommendations	305
6.2	Restore	308
6.3	Performance	310
6.3.1	Performance Factors	310
6.3.2	Backup Performance	311
6.3.3	Restore Performance	313
6.4	Summary	314

7 Disaster Recovery

315

7.1	Preliminary Considerations	315
7.2	Planning for an Emergency	317
7.2.1	Which Measures Apply to Disaster Recovery?	317
7.2.2	When Should the Disaster Recovery Procedure Begin? ...	318
7.2.3	Expected Downtime	319
7.2.4	Restore Time	320
7.2.5	Communication in the Event of a Disaster	320
7.3	Recovery Team and Role Distribution	321
7.4	Types of Disaster Recovery	323
7.5	Emergency Scenarios	323
7.5.1	Damaged Database	324
7.5.2	Hardware Failure	324
7.5.3	Complete Loss or Destruction of the Server Facility	325
7.6	Recovery Script	327
7.7	Crash Kit	329
7.8	Testing the Disaster Recovery Procedure	333
7.9	Minimizing the Risk of Failure	335
7.9.1	Minimizing the Risk of Human Error	335
7.9.2	Minimizing Single Points of Failure	335
7.10	Continuing Business During a System Recovery	336
7.11	Summary	337

8 Database Administration

339

8.1	Planning Database Administration Tasks	340
8.1.1	Planning Database Tasks	340
8.1.2	Changing and Deleting Database Tasks	344

8.1.3	Checking the DBA Planning Calendar	347
8.2	Checking Database Actions	350
8.3	Performing a Database Analysis	352
8.4	Monitoring Database Performance	359
8.5	Database Administration—DB2	363
8.5.1	DB2 Command Line Processor	364
8.5.2	Starting and Stopping the Database	367
8.5.3	Executing SQL Statements	368
8.5.4	Updating and Checking the Database Manager Configuration	369
8.5.5	Updating and Checking the Database Configuration	371
8.5.6	Managing Tablespaces and Associated Containers	372
8.5.7	Backing Up the Database	375
8.5.8	Restoring the Database	377
8.6	Database Administration—Oracle	379
8.6.1	SQL*Plus	379
8.6.2	Starting and Stopping the Database	382
8.6.3	Executing SQL Statements and SQL Scripts	387
8.6.4	Managing the Database	389
8.6.5	BR*Tools	389
8.6.6	Checking and Changing the Status of the Database Instance	391
8.6.7	Checking and Updating the Database Configuration	393
8.6.8	Managing Tablespaces and Associated Data Files	396
8.6.9	Backing Up the Database	400
8.6.10	Restoring the Database	404
8.6.11	Checking the Database	407
8.7	Database Administration—Microsoft SQL Server	410
8.7.1	SQL Management Studio	411
8.7.2	Starting and Stopping the Database	413
8.7.3	Files and Logs	416
8.7.4	Initiating a Backup Process	422
8.7.5	Setting Up Maintenance Plans for a Backup	425
8.7.6	Backing Up System Databases	431
8.7.7	SQL Server Logs	434
8.8	Database Administration—MaxDB	435
8.8.1	Database Studio	435
8.8.2	Starting and Stopping the Database	436
8.8.3	Database Monitoring	438

8.8.4	Backing Up the Database	443
8.9	Summary	447

9 Operating System Administration **449**

9.1	Checking the Memory Usage of the File System	449
9.1.1	Monitoring the File System Using the CCMS Alert Monitor	450
9.1.2	Changing Alert Thresholds	452
9.1.3	Releasing Memory at the Operating System Level	454
9.2	Retrieving Operating System Information	458
9.3	Summary	464

10 Security Administration **465**

10.1	What Is Security?	466
10.1.1	Protecting Data Against Damage or Loss	466
10.1.2	Adhering to Legal or Quasi-Legal Provisions	466
10.2	Security Levels	467
10.2.1	Access Security	467
10.2.2	Operational Security	469
10.2.3	Data Security	470
10.3	Safeguarding the SAP System	471
10.3.1	Preventing Multiple User Logons	472
10.3.2	Passwords	473
10.3.3	Limiting Access for SAP* or DDIC Users	477
10.3.4	Locking Critical Transactions	477
10.3.5	Preventing Changes in the Production System	480
10.3.6	Operational Security	486
10.4	Audits	487
10.4.1	Auditing Aspects	488
10.4.2	Auditing Tasks for SAP Administrators	489
10.5	Auditing Tools	491
10.5.1	Audit Information System	491
10.5.2	Security Audit Log	493
10.6	Summary	507

11 Performance**509**

11.1	Short-Term Remedy of Performance Problems	509
11.2	Detailed Analysis of Performance Problems	514
11.2.1	System Load Analysis	515
11.2.2	Buffer Analysis	520
11.2.3	Memory Defragmentation	522
11.3	Analysis at Other Levels	523
11.3.1	Analysis at the Database Level	523
11.3.2	Analysis at the Operating System Level	523
11.3.3	Analysis at the Hardware Level	523
11.4	Summary	524

12 SAP GUI**25**

12.1	Installation Requirements	525
12.1.1	Minimum Requirements for the User's PC	525
12.1.2	Network Functions	526
12.2	Installation Scenarios	526
12.2.1	Installing SAP GUI from an Installation Medium	527
12.2.2	Installing SAP GUI from an Installation Server	530
12.3	Adding Systems to SAP Logon	547
12.4	Summary	550

13 User Administration**551**

13.1	General	551
13.2	Setting Up New Users	554
13.2.1	Copying Existing Users	554
13.2.2	Creating a New User	562
13.3	Maintaining Users	563
13.4	Mass Changes	563
13.5	Resetting the Password	566
13.6	Locking or Unlocking a User	568
13.7	Central User Administration	571
13.7.1	Setting Up a Central User Administration	571
13.7.2	Creating and Maintaining Users Via a Central User Administration	592

13.7.3	Troubleshooting	596
13.7.4	Deactivating or Deleting a Central User Administration ...	599
13.8	User Groups	608
13.9	Deleting User Sessions	610
13.9.1	Displaying Active Users	610
13.9.2	Deleting User Session	612
13.10	System Administration	613
13.10.1	Special User IDs	613
13.10.2	Special Authorizations	614
13.10.3	User Passwords	615
13.11	Summary	616

14 Authorization Management

617

14.1	Authorization Check Process	618
14.2	Authorization Roles	618
14.2.1	Creating and Maintaining Single Roles	619
14.2.2	Creating and Maintaining Composite Roles	629
14.3	Authorization Profiles	636
14.4	Utilities for Authorization Management	640
14.4.1	Default Values and Check Indicators	640
14.4.2	Authorization Trace	645
14.4.3	Infosystem Authorizations	650
14.5	Summary	652

15 Background Processing

653

15.1	Creating Background Jobs	653
15.1.1	General	654
15.1.2	Creating and Scheduling Background Jobs	655
15.2	Monitoring Background Jobs	662
15.3	Graphical Job Scheduling Monitor	665
15.4	Performance Factors for Background Jobs	666
15.5	Summary	669

16 Output Management

671

16.1	Setting Up the Spool Servers	671
------	------------------------------------	-----

16.2	Setting up Printers	675
16.2.1	Configuring Network Printers	675
16.2.2	Setting up Frontend Printers	681
16.2.3	Transporting Output Devices	684
16.3	Outputting Data	686
16.4	Output Control	688
16.5	Deleting Old Spool Requests	695
16.6	Checking the Spool Consistency	696
16.7	Checking the TemSe Consistency	697
16.8	Summary	699

17 Change and Transport Management

701

17.1	General Notes on Change Management	702
17.2	Transporting Objects	704
17.2.1	Creating a Transport Request	705
17.2.2	Recording Changes in a Transport Request	708
17.2.3	Releasing a Transport Request	710
17.2.4	Importing Transport Requests	713
17.2.5	Checking the Transport Log	719
17.3	Direct Table Maintenance	721
17.4	Summary	725

18 System Maintenance

727

18.1	Downloading SAP Support Packages	728
18.1.1	Determining the System's Current Support Package Level	729
18.1.2	Finding Support Packages	734
18.1.3	Downloading Support Packages	748
18.2	Important Notes on Preparing and Executing System Maintenance	751
18.3	Performing a Kernel Update	752
18.3.1	Kernel Backup	753
18.3.2	Unpacking a New Kernel	753
18.3.3	Stopping the SAP System	755
18.3.4	Replacing Kernel Files	755
18.3.5	Starting the SAP System and Checking the Logs	756

18.4	Applying the SPAM/SAINT Update	757
18.5	Importing ABAP Support Packages	761
18.5.1	Making the Support Packages Available	762
18.5.2	Importing the Support Packages	766
18.5.3	Performing a Modification Adjustment	778
18.5.4	Regenerating Objects	779
18.5.5	Performing Regression Tests	783
18.6	Installing Add-Ons	783
18.7	Summary	789
19	Diagnostics and Troubleshooting	791
19.1	Basic Procedure	791
19.2	Troubleshooting with the SAP Support Portal	794
19.2.1	Searching for SAP Notes with the SAP Support Portal ...	795
19.2.2	Customer Messages	798
19.3	Creating a Remote Service Connection	819
19.4	Implementing SAP Notes	828
19.4.1	Checking the System Patch Level	830
19.4.2	Implementing SAP Notes with the Note Assistant	832
19.5	Summary	836
Appendices		837
A	Useful Transactions	839
B	Security-Relevant Transactions	845
