

TABLE OF CONTENTS

U.Felgner, T.B.Flannagan	
Wellordered subclasses of proper classes	1
H. Friedman	
A proof of foundation from axioms of cumulation	15
Categoricity with respect to ordinals	17
Classically and intuitionistically provably recursive functions ...	21
K.Gloede	
Hierarchies of sets definable by means of infinitary languages	29
P.Hájek	
Some results on degrees of constructibility	55
H.R. Jervell	
Constructive universes I	73
A.Kanamori, M.Magidor	
The evolution of large cardinal axioms in set theory	99
A.S.Kechris	
Forcing in analysis	277
A.Louveau	
Recursiveness and compactness	303
W.Maass	
Fine structure theory of the constructible universe in $\mathcal{L}$ -and β recursion theory	339
W.Marek, P.Zbierski	
On a class of models of the n^{th} order arithmetic	361
A.R.D.Mathias	
$\mathfrak{o}^{\#}$ and the p-point problem	375
K.Mc Aloon	
A combinatorial characterization of inaccessible cardinals	385

M.Srebrny	
Singular cardinals and analytic games	391
K.Steffens	
Regressive functions and stationary sets	423
P.Štěpánek	
Cardinals in the inner model HOD	437
J.Stern	
Partitions of the real line into $\mathcal{X}_1$ closed sets	455
G.Takeuti	
Gödel numbers of product spaces	461
J.Truss	
A note on increasing sequences of constructibility degrees	473
