

Preface	VIII	<i>Chapter 16</i> Metamorphic-metasomatic hypothesis	57
<i>Chapter 1</i> Olivine blastoids in olivinefels with nematoblastic (velonblastic) tremolite. (Olivine megablasts along shearing planes of olivinefels)	1	<i>Chapter 17</i> Is the Bushveld complex igneous?	59
<i>Chapter 2</i> Metasomatic transformations of marbles. (Olivine, pyroxene, amphibole, mica and plagioclase blastesis) ..	4	<i>Chapter 18</i> Banded dunites with bands of chromite	62
<i>Chapter 3</i> Metasomatic serpentine in marbles	7	<i>Chapter 19</i> The ultrabasic archean greenstone peridotitic volcanic flows and the significance of spinifex textures	65
<i>Chapter 4</i> Basic and ultrabasic rocks related with granite and as inclusions in the granite (e.g. example provided by considering the Seriphos granite and skarns)	10	<i>Chapter 20</i> Intrusive ring complexes	68
<i>Chapter 5</i> Eclogites and eclogites	14	<i>Chapter 21</i> Tectonic deformation textures in basic and ultrabasic rocks	70
<i>Chapter 6</i> Blastic magnetite with ilmenite ex-solutions in epizonal chlorite with anthophyllite blastic growths	17	<i>Chapter 22</i> The mineralogy, geochemistry, ore-microscopy of ore minerals and bodies associated with basic and ultrabasic bodies	72
<i>Chapter 7</i> Mafic crystalloblast	22	<i>Chapter 23</i> Chromite ores in ultrabasics	75
<i>Chapter 8</i> Gabbroic rocks—Essexites	25	<i>Chapter 24</i> The distribution of Pt-group elements and the Pt-group minerals in the basic and ultrabasic rocks	79
<i>Chapter 9</i> Norites – Troctolites – Shonkinites – Theralites – Jacubirangites	30	<i>Chapter 25</i> The mineralogical and geochemical distribution of sulphides in basic and ultrabasic bodies	83
<i>Chapter 10</i> Peridotites	35	<i>Chapter 26</i> The significance of magnetite and magnetite with titaniferous “ex-solutions” in basic and ultrabasic rocks	86
<i>Chapter 11</i> Lamprophyres	40	<i>Chapter 27</i> On the alteration and weathering of basic and ultrabasic rocks	89
<i>Chapter 12</i> Feldspathisation (Anorthositization)	43	<i>Chapter 28</i> Textures of olivine serpentinisation	92
<i>Chapter 13</i> Kimberlites	46	<i>Chapter 29</i> The reaction chromite-serpentine	94
<i>Chapter 14</i> Layered basic and ultrabasic complexes	51	<i>Chapter 30</i> Differential leaching of elements from ultrabasic rocks and birbiritisation of dunites	96
<i>Chapter 15</i> Volcanic or subvolcanic hypothesis of the basic and ultrabasic intrusive plutonics	55		

Chapter 31

Low-temperature mobilisation of the Pt-group elements in lateritic covers (Synoptical discussion)	99
---	----

Chapter 32

Alteration of dunite, magnesite formation	101
---	-----

Chapter 33

Lateritisation processes of serpentine and altered dunitic rocks	103
--	-----

Chapter 34

Metasomatic alterations of ultrabasics	106
Illustrations	109
