

TABLE OF CONTENTS

	Page
Basic Notation	VII
§0. Introduction	1
Chapter I. Analytic Families of Solutions	3
§1. Auxiliary Lemma	3
§2. Normal Form	6
§3. Normal Form on an Invariant Surface	14
§4. Liapunov's First Method	23
§5. Analytic Family of Periodic Solutions	28
§6. Special Cases	33
§7. Bifurcation Equation	42
Chapter II. Stability	48
§8. Stability by the First Approximation	48
§9. Liapunov's Second Method	50
§10. Quasi-Normal Form	58
§11. Reduction Principle	67
§12. Critical Case of One Zero Eigenvalue	75
§13. Critical Case of One Pair of Pure Imaginary Eigenvalues	84
Chapter III. Quasi-Periodic Solutions	91
§14. Preliminaries	91
§15. Principle Theorem	96
§16. Formal Construction	102
§17. Inductive Lemma	111
§18. Technical Lemmas	121
§19. Passage to the Limit	125
§20. Special Cases	130
Appendix. Poincaré's Problem	136
References	145
Index	147
