

Contents

A representation theory for fibered knots and their monodromy maps	Joan S. Birman	1
Homogeneity of $S^2 \times T^2$	W. R. Brakes	9
A Link Calculus for 4-manifolds	Eugenia César de Sá	16
Nice Spines of 3-manifolds	Roger Fenn and Colin Rourke	31
Introducing Doodles	Roger Fenn and Paul Taylor	37
Generators for the mapping class group	Stephen P. Humphries	44
On the mapping class group of simple 3-manifolds	Klaus Johannson	48
Shake-slice knots	W.B. Raymond Lickorish	67
Signatures of iterated torus knots	R. A. Litherland	71
Some homology 3-spheres which bound acyclic 4-manifolds	Nigel Martin	85
A criterion of an embedded surface in R^3 to be unknotted	H. R. Morton	93
An elliptical path from parabolic representations to hyperbolic structures	Robert Riley	99
Presentations and the trivial group	Colin Rourke	134
On the genera of knots	Laurence R. Taylor	144
