

TABLE DES MATIERES

Dan BARBASCH	Fourier Transforms of some invariant Distributions on a Semisimple Lie Group and Lie Algebra	1
Weita CHANG	Global Solvability of BI-invariant Differential Operators on Solvable Lie Groups	8
Laurent CLOZEL	"Base Change" géométrique : Relèvement de la série principale de $GL(n, \mathbb{C}/\mathbb{R})$	17
Jacques DIXMIER	Sur la méthode des orbites	42
Michel DUFLO	Polynômes de Vogan pour $SL(n, \mathbb{C})$	64
Mogens FLENSTED-JENSEN	On a fundamental series of representations related to an affine symmetric space	77
Hans Plesner JAKOBSEN	Higher Order Tensor Products of Wave Equations	97
Kenneth D. JOHNSON & Adam KORANYI	Generalized Hua Operators on Bounded Symmetric Domains	*
Anthony JOSEPH	W-Module Structure in the Primitive Spectrum of the enveloping Algebra of a Semisimple Lie Algebra	116
Masaki KASHIWARA & Michèle VERGNE	Functions on the Shilov Boundary of the Generalized Half Plane	136
Masaki KASHIWARA & Michèle VERGNE	K-types and Singular Spectrum	177
Henri MOSCOVICI	Avanishing Theorem for L^2 -cohomology in the nilpotent case	201
Niels Vigand PEDERSEN	Semicharacters of Solvable Lie Groups ..	*
Stephen RALLIS	The Eichler Commutation Relation and the Continuous Spectrum of the Weil Representation	211
