

Contents

Standard Symbols	ix
Chapter I	
Introduction	1
1. André's Description of Translation Planes	1
2. An Alternative Description of Translation Planes	7
3. Homologies and Shears of Translation Planes	10
4. A Characterization of Pappian Planes	17
5. Quasifields	22
Chapter II	
Generalized André Planes	25
6. Some Number Theoretic Tools	25
7. Finite Nearfield Planes	30
8. The Nearfield Plane of Order 9	36
9. Generalized André Planes	41
10. Finite Generalized André Planes	47
11. Homologies of Finite Generalized André Planes	50
12. The André Planes	53
13. The Hall Planes	57
14. The Collineation Group of a Generalized André Plane	61
Chapter III	
Rank-3-Planes	68
15. Line Transitive Affine Planes	68
16. Affine Planes of Rank 3	76

17. Rank-3-Planes with an Orbit of Length 2 on the Line at Infinity	80
18. The Planes of Type $R * p$	88
19. The Planes of Type $F * p$	95
20. Exceptional Rank-3-Planes	102

Chapter IV

The Suzuki Groups and Their Geometries	104
21. The Suzuki Groups $S(K, \sigma)$	104
22. The Simplicity of the Suzuki Groups	111
23. The Lüneburg Planes	113
24. The Subgroups of the Suzuki Groups	115
25. Möbius Planes	123
26. The Möbius Planes Belonging to the Suzuki Groups	128
27. $S(q)$ as a Collineation Group of $PG(3, q)$	130
28. $S(q)$ as a Collineation Group of a Plane of Order q^2	133
29. Geometric Partitions	139
30. Rank-3-Groups	142
31. A Characterization of the Lüneburg Planes	147

Chapter V

Planes Admitting Many Shears	151
32. Unitary Polarities of Finite Desarguesian Projective Planes and Their Centralizers	151
33. A Characterization of A_5	160
34. A Characterization of Galois Fields of Odd Characteristic	165
35. Groups Generated by Shears	172

Chapter VI

Flag Transitive Planes	181
36. The Uniqueness of the Desarguesian Plane of Order 8	181
37. Soluble Flag Transitive Collineation Groups	183
38. Some Characterizations of Finite Desarguesian Planes	193
39. Translation Planes Whose Collineation Group Acts Doubly Transitively on l_∞	203
40. A Theorem of Burmester and Hughes	210
41. Bol Planes	210

Chapter VII

Translation Planes of Order q^2 Admitting

$SL(2, q)$ as a Collineation Group 214

42. Ovals in Finite Desarguesian Planes 214

43. Twisted Cubics 221

44. Irreducible Representations of $SL(2, 2')$ 226

45. The Hering and the Schäffer Planes 233

46. Three Planes of Order 25 235

47. Quasitransvections 244

48. Desarguesian Spreads in $V(4, q)$ 248

49. Translation Planes of Order q^2 Admitting $SL(2, q)$ as
a Collineation Group 249

50. The Collineation Groups of the Hering and
Schäffer Planes 261

51. The Theorem of Cofman-Prohaska 263

52. Prohaska's Characterization of the Hall Planes 267
