

CONTENTS

1.	Daniel Asimov and Herman Gluck	Morse-Smale fields of geodesics	1
2.	Louis Block, John Guckenheimer, Michal Misiurewicz, and Lai-Sang Young	Periodic points and topological entropy of one dimensional maps	18
3.	Robert Burton and Robert W. Easton	Ergodicity of linked twist maps	35
4.	Carmen Chicone and R. C. Swanson	Infinitesimal hyperbolicity implies hyperbolicity	50
5.	C. Conley	A qualitative singular pertur- bation theorem	65
6.	Joseph G. Conlon	On a theorem of Conley and Smoller	90
7.	Ethan M. Coven and William L. Reddy	Positively expansive maps of compact manifolds	96
8.	J. H. Curry	An algorithm for finding closed orbits	111
9.	Robert L. Devaney	Linked twist mappings are almost Anosov	121
10.	John M. Franks	Symbolic dynamics, homology, and knots	146
11.	John M. Franks and Bob Williams	Anomalous Anosov flows	158
12.	David Fried	Efficiency vs. hyperbolicity on tori	175
13.	Herman Gluck	Dynamical behavior of geodesic fields	190
14.	John Guckenheimer	The growth of topological entropy for one-dimensional maps	216
15.	C. S. Hartzman and D. R. Naugler	Separatrices, non-isolated in- variant sets, and the Seifert conjecture	224

16.	M. V. Jakobson	Construction of invariant measures absolutely continuous with respect to dx for some maps of the interval	246
17.	Sveltana R. Katok	The estimation from above for the topological entropy of a diffeomorphism	258
18.	H. B. Keynes and D. Newton	Ergodicity in (G, σ) - extensions	265
19.	Yuri Kifer	A probabilistic version of Bowen-Ruelle's volume lemma	291
20.	Mark Levi	Periodically forced relaxation oscillations	300
21.	W. de Melo and J. Palis	Moduli of stability for diffeomorphisms	318
22.	Dean A. Neumann	Uncountably many distinct topologically hyperbolic equilibria in $\mathbb{R}^4$	340
23.	S. E. Newhouse	Dynamical properties of certain non-commutative skew products	353
24.	Zbigniew Nitecki	A note on explosive flows	364
25.	Carles Perelló	Intertwining invariant manifolds and the Lorenz attractor	375
26.	Everett Pitcher	Counting compatible boundary conditions	379
27.	David Ruelle and Michael Shub	Stable manifolds for maps	389
28.	Stephen Schecter and Michael F. Singer	Singular points of planar vector fields	393
29.	Douglas Shafer	Gradient vectorfields near degenerate singularities	410
30.	Carles Simó	Invariant curves near parabolic points and regions of stability	418

31.	Floris Takens	Motion under the influence of a strong constraining force	425
32.	Russell B. Walker	Conjugacies of topologically hyperbolic fixed points: a necessary condition on foliations	446
33.	F. Wesley Wilson	Coleman's conjecture on topological hyperbolicity	458
34.	E. C. Zeeman	Population dynamics from game theory	471
