

## Chapter 1

<b>The Opportunity of the Ocean</b>	<b>1</b>
-------------------------------------	----------

## Chapter 2

<b>How the Ocean Works</b>	<b>5</b>
----------------------------	----------

Introduction	5
--------------	---

General Characteristics of the Oceans	7
---------------------------------------	---

The Origin of the Oceans	7
--------------------------	---

General Topography of the Ocean	11
---------------------------------	----

Origin of the Ocean Basin	14
---------------------------	----

Water	17
-------	----

Physical Oceanography	18
-----------------------	----

Chemical Oceanography	22
-----------------------	----

Biological Oceanography	27
-------------------------	----

Marine Geology–Geological Oceanography	33
----------------------------------------	----

References	36
------------	----

## Chapter 3

<b>The Legal Aspects of the Ocean</b>	<b>38</b>
---------------------------------------	-----------

Events Leading to the Truman Proclamation	38
-------------------------------------------	----

The Truman Proclamation	40
-------------------------	----

The 1958 and 1960 Geneva Conventions on the Law of the Sea	42
------------------------------------------------------------	----

Events Leading to the Law of the Sea Conferences in the 1970s	50
---------------------------------------------------------------	----

Basic Issues of the Law of the Sea Conferences of the 1970s	54
The Freedom of Scientific Research Issue	63
References	71
Chapter 4	
<b>Marine Shipping</b>	73
Introduction	73
The World Shipping Fleet	75
The United States Shipping Fleet	82
Port and Offshore Facilities	86
Problems Associated with Shipping	92
Shipping and the Law of the Sea	99
References	101
Chapter 5	
<b>The Resources of the Ocean</b>	103
Introduction	103
Mineral Resources of the Ocean	105
Marine Resources of the Continental Margin	107
Resources of the Deep Sea	132
Biologic Resources of the Ocean	155
References	186
Chapter 6	
<b>Marine Pollution</b>	194
Introduction	194
Domestic, Industrial, and Agricultural Pollution	197
Ocean Dumping	205
Hydrocarbon Pollution	208
Pollution Resulting from Exploration and Exploitation of Marine Mineral Resources	220
Radioactive and Thermal Wastes	223
Conclusions	224
References	225
Chapter 7	
<b>Military Uses of the Ocean</b>	231
Introduction	231
Antisubmarine Warfare	233
Relative Naval Strengths of the United States and the USSR	243

Military Use of the Ocean and the Law of the Sea	245
References	247
 Chapter 8	
<b>The Coastal Zone</b>	<b>248</b>
Introduction	248
Ownership and Definition of Coastal Regions	249
Oceanographic Processes Relative to the Coastal Zone	251
Coastal Erosion	257
Estuaries and Marshes	259
Human Activity in the Coastal Zone	263
Use of the Coastal Zone	267
References	273
 Chapter 9	
<b>Innovative Uses of the Ocean</b>	<b>275</b>
Energy from the Sea	275
Climate and the Ocean	291
Fresh Water from the Sea	295
Disposal of Nuclear Wastes in the Deep Sea	299
Innovative Opportunities for Using Marine Organisms	301
Other Innovative Ideas	305
References	310
